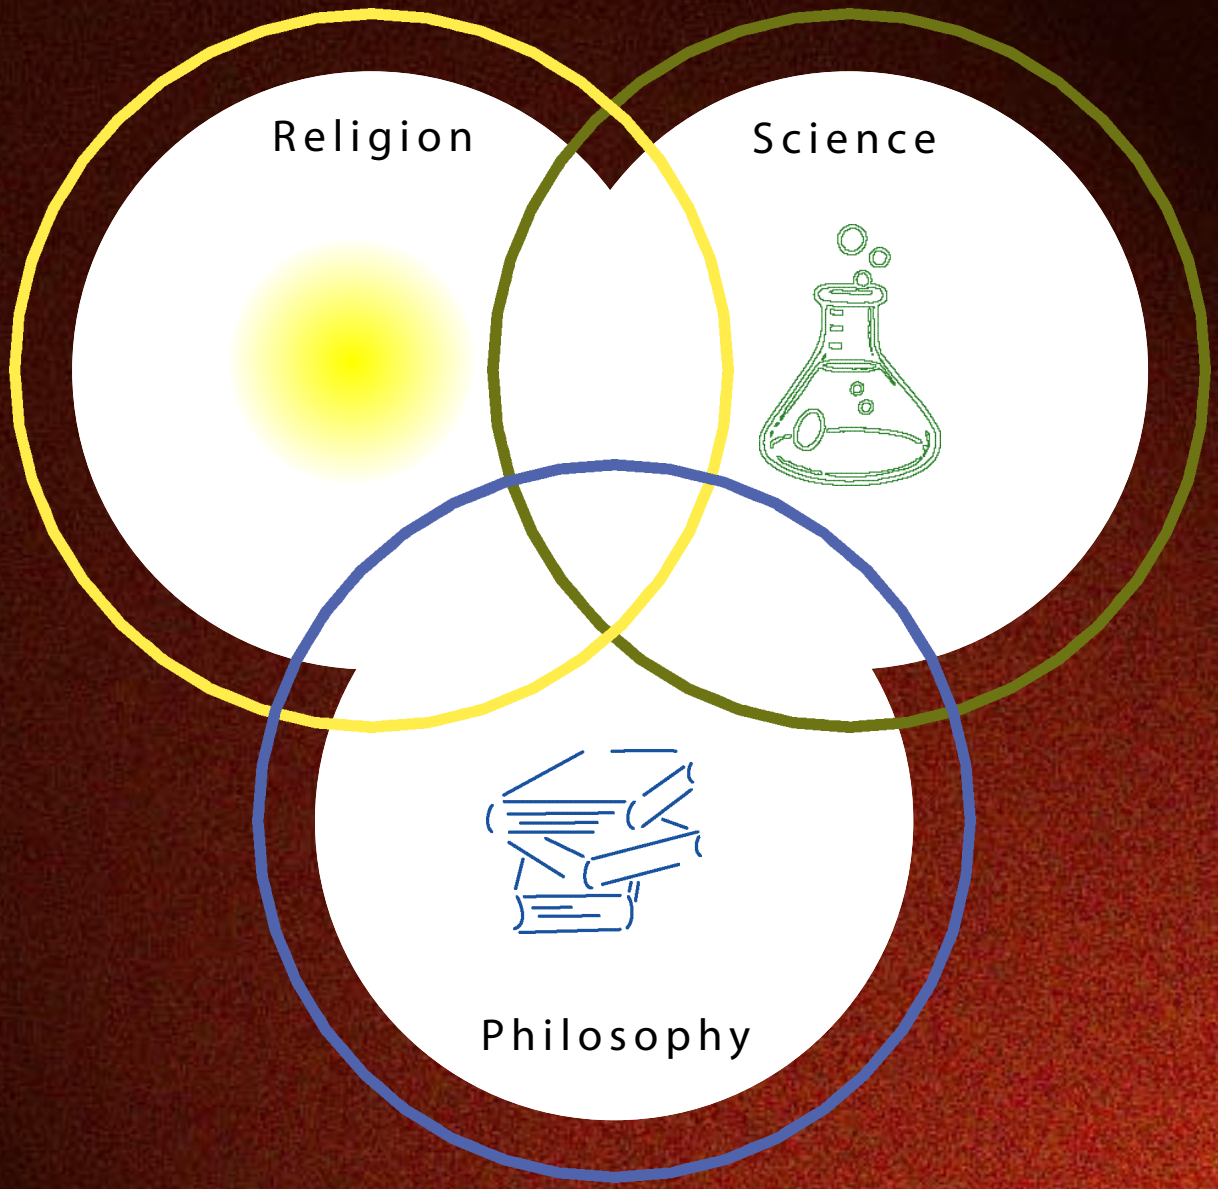
Module: 16

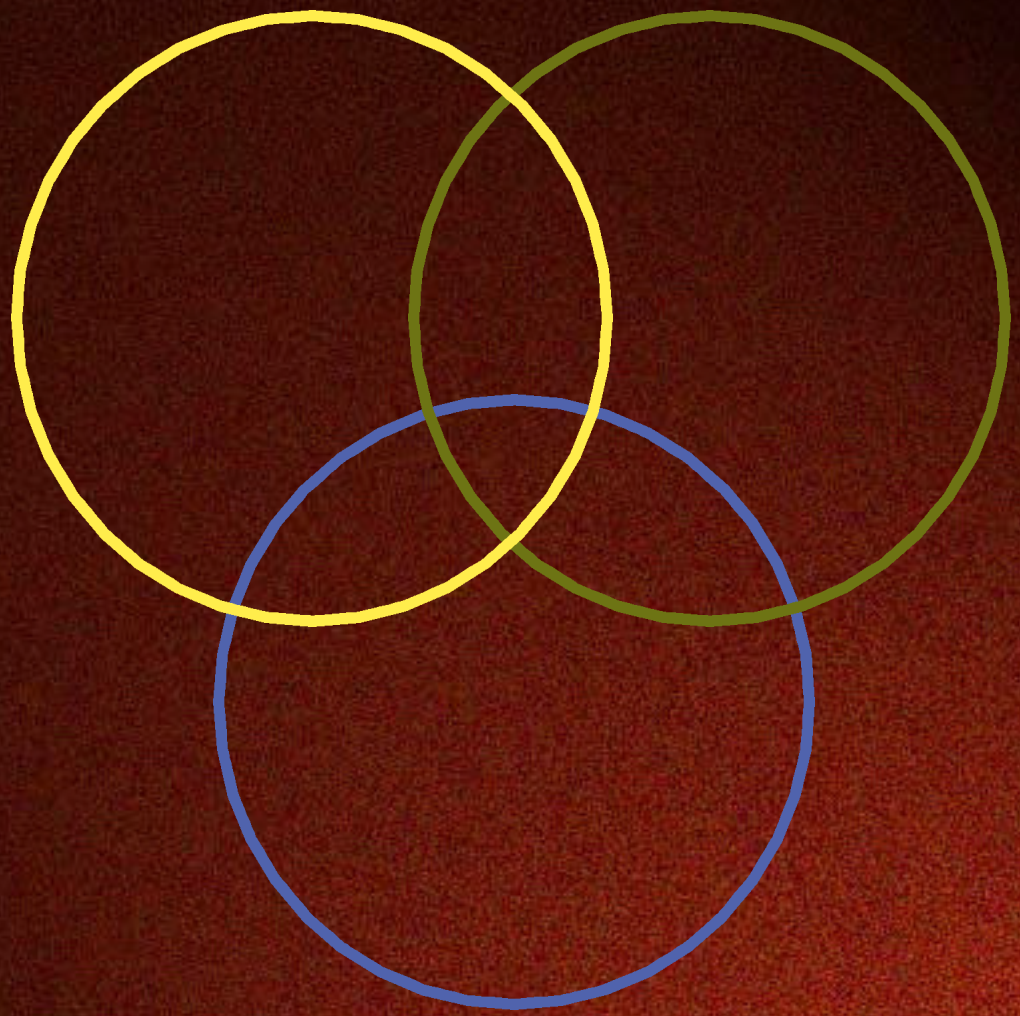
The World Embracing Hope Foundation

Competition For a Universal Philosophy



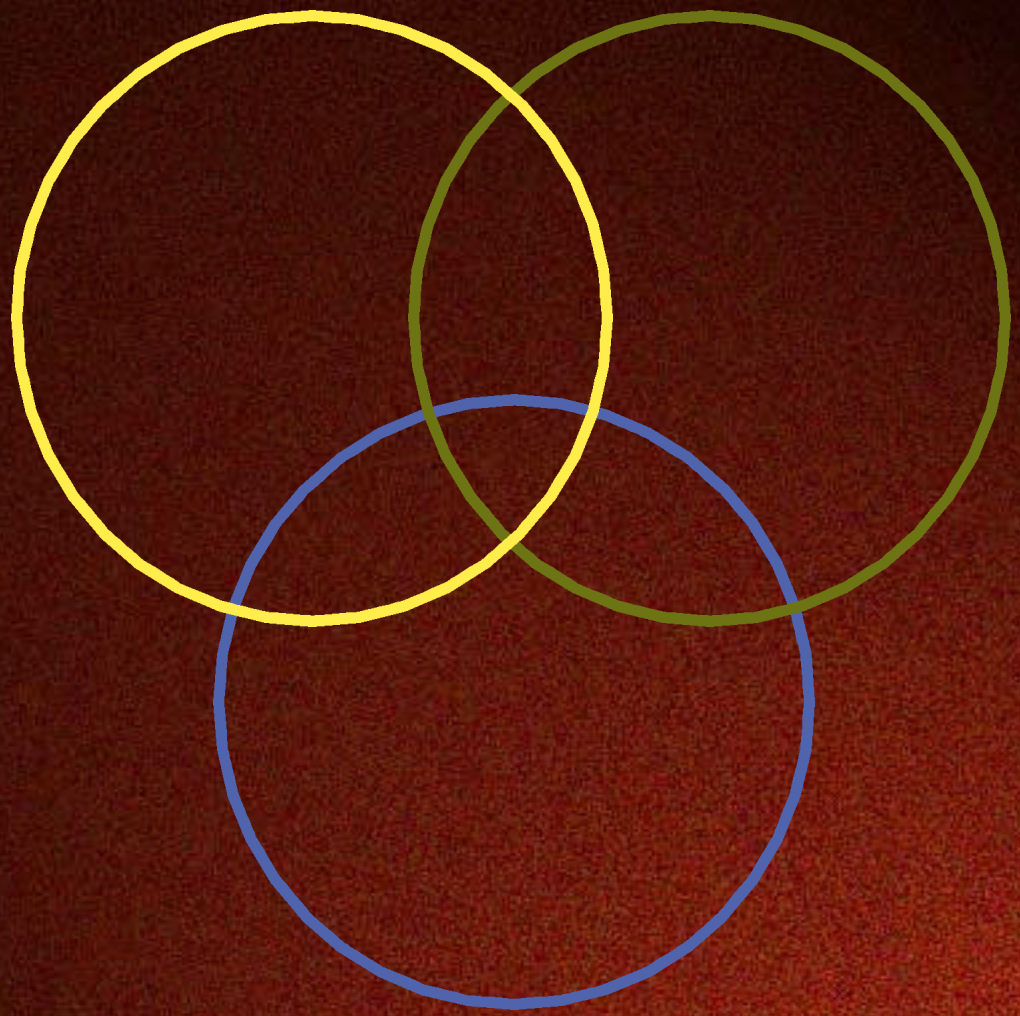
The World Embracing Hope Foundation is

sponsoring a global competition for our specie, via the World Wide Web, a place



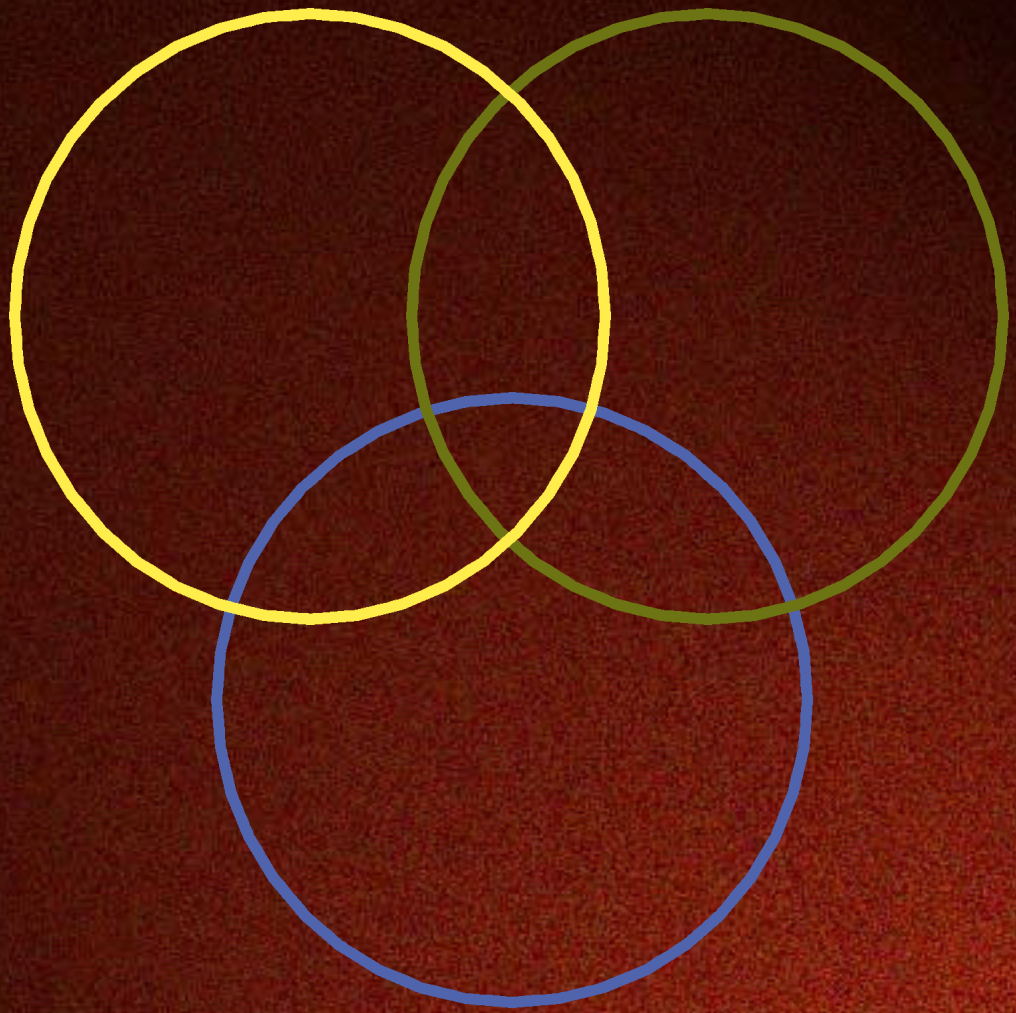
w w w . w e h o p e . c o m

where we can all sit and listen, debate together
- all at the same time. This is sponsored



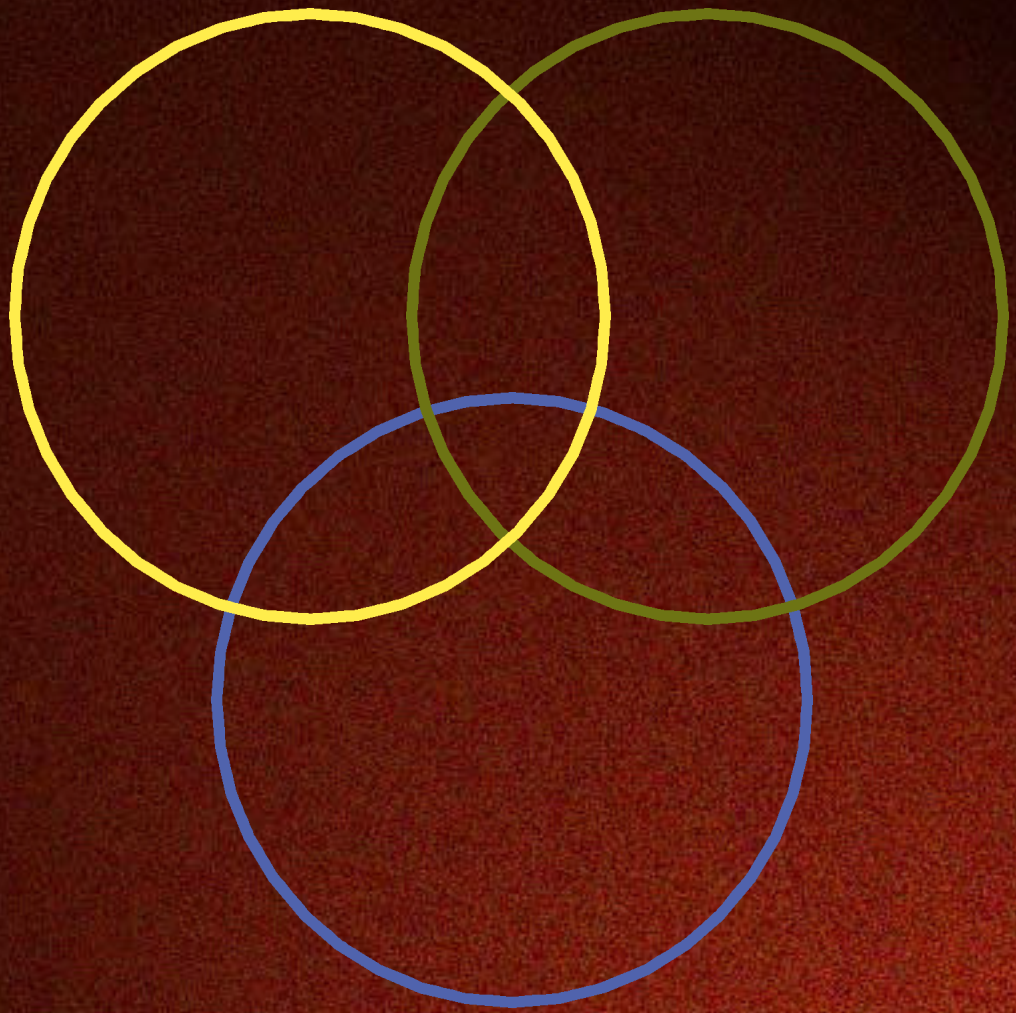
w w w . w e h o p e . c o m

by private individuals and humanitarian organizations.
There are no membership fees - or fees of any kind.



w w w . w e h o p e . c o m

The www.wehope.com site is intended to be a place for you to observe the progress of our specie as it



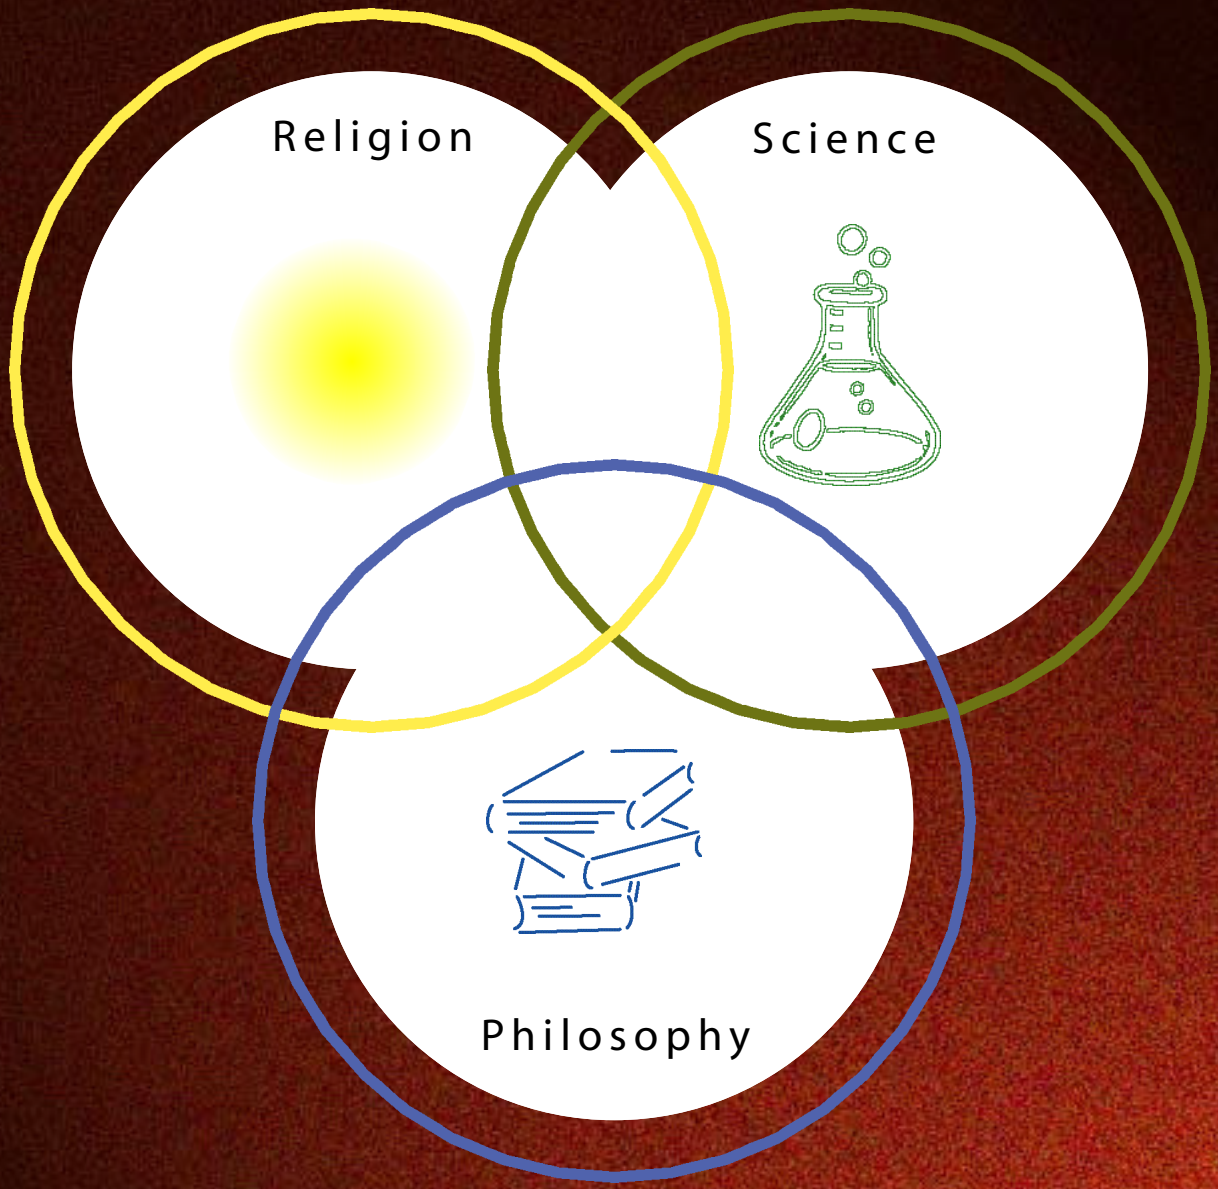
w w w . w e h o p e . c o m

attempts to build a Universal Philosophy, a Universal Ethic.

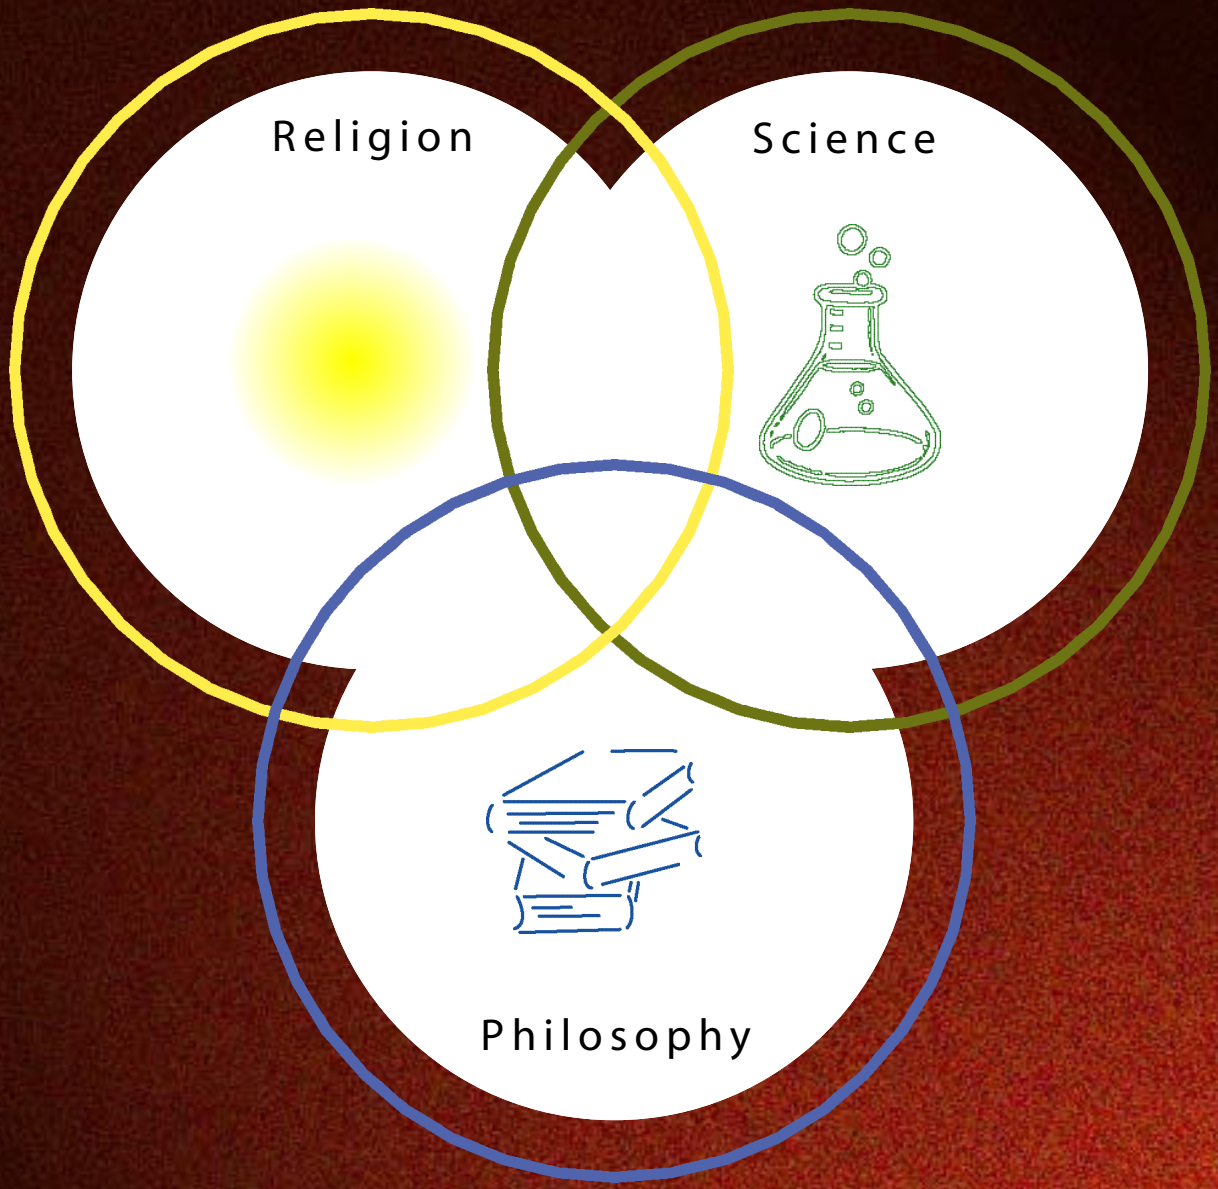
DISCUSSING...

- Cosmological systems — Science
- Ontological systems — Religion
- Metaphysical systems — Philosophy

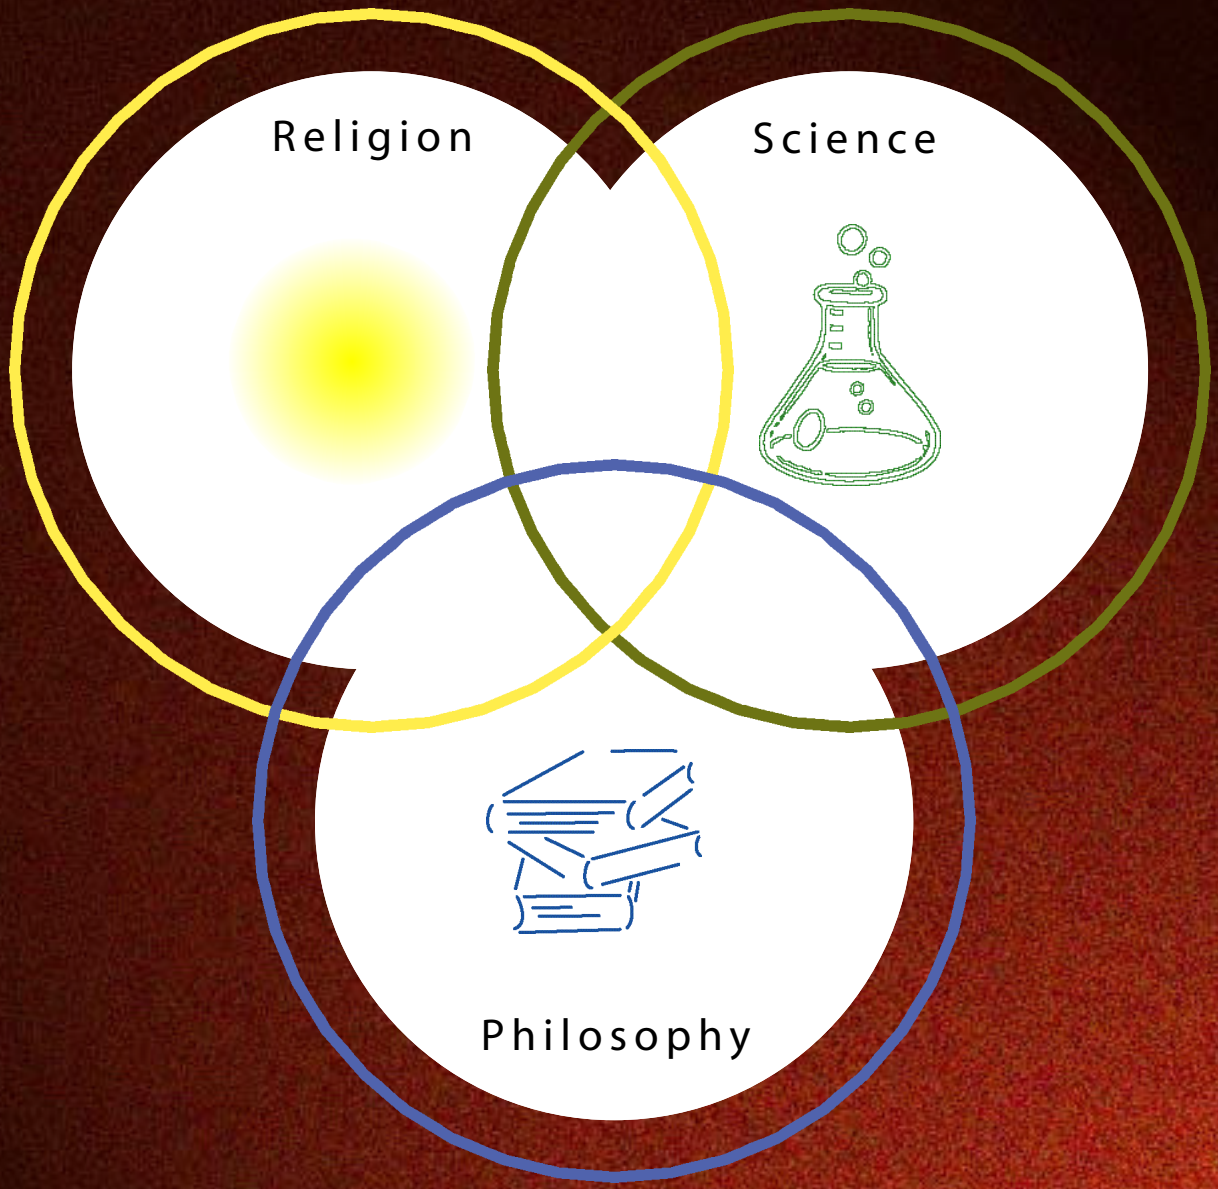
You are welcome to join the discussion.



The World Embracing Hope Foundation will act as the referee and the arena for free debate.



The World Embracing Hope Foundation will act as a neutral zone where science, religion, and philosophy can freely debate.

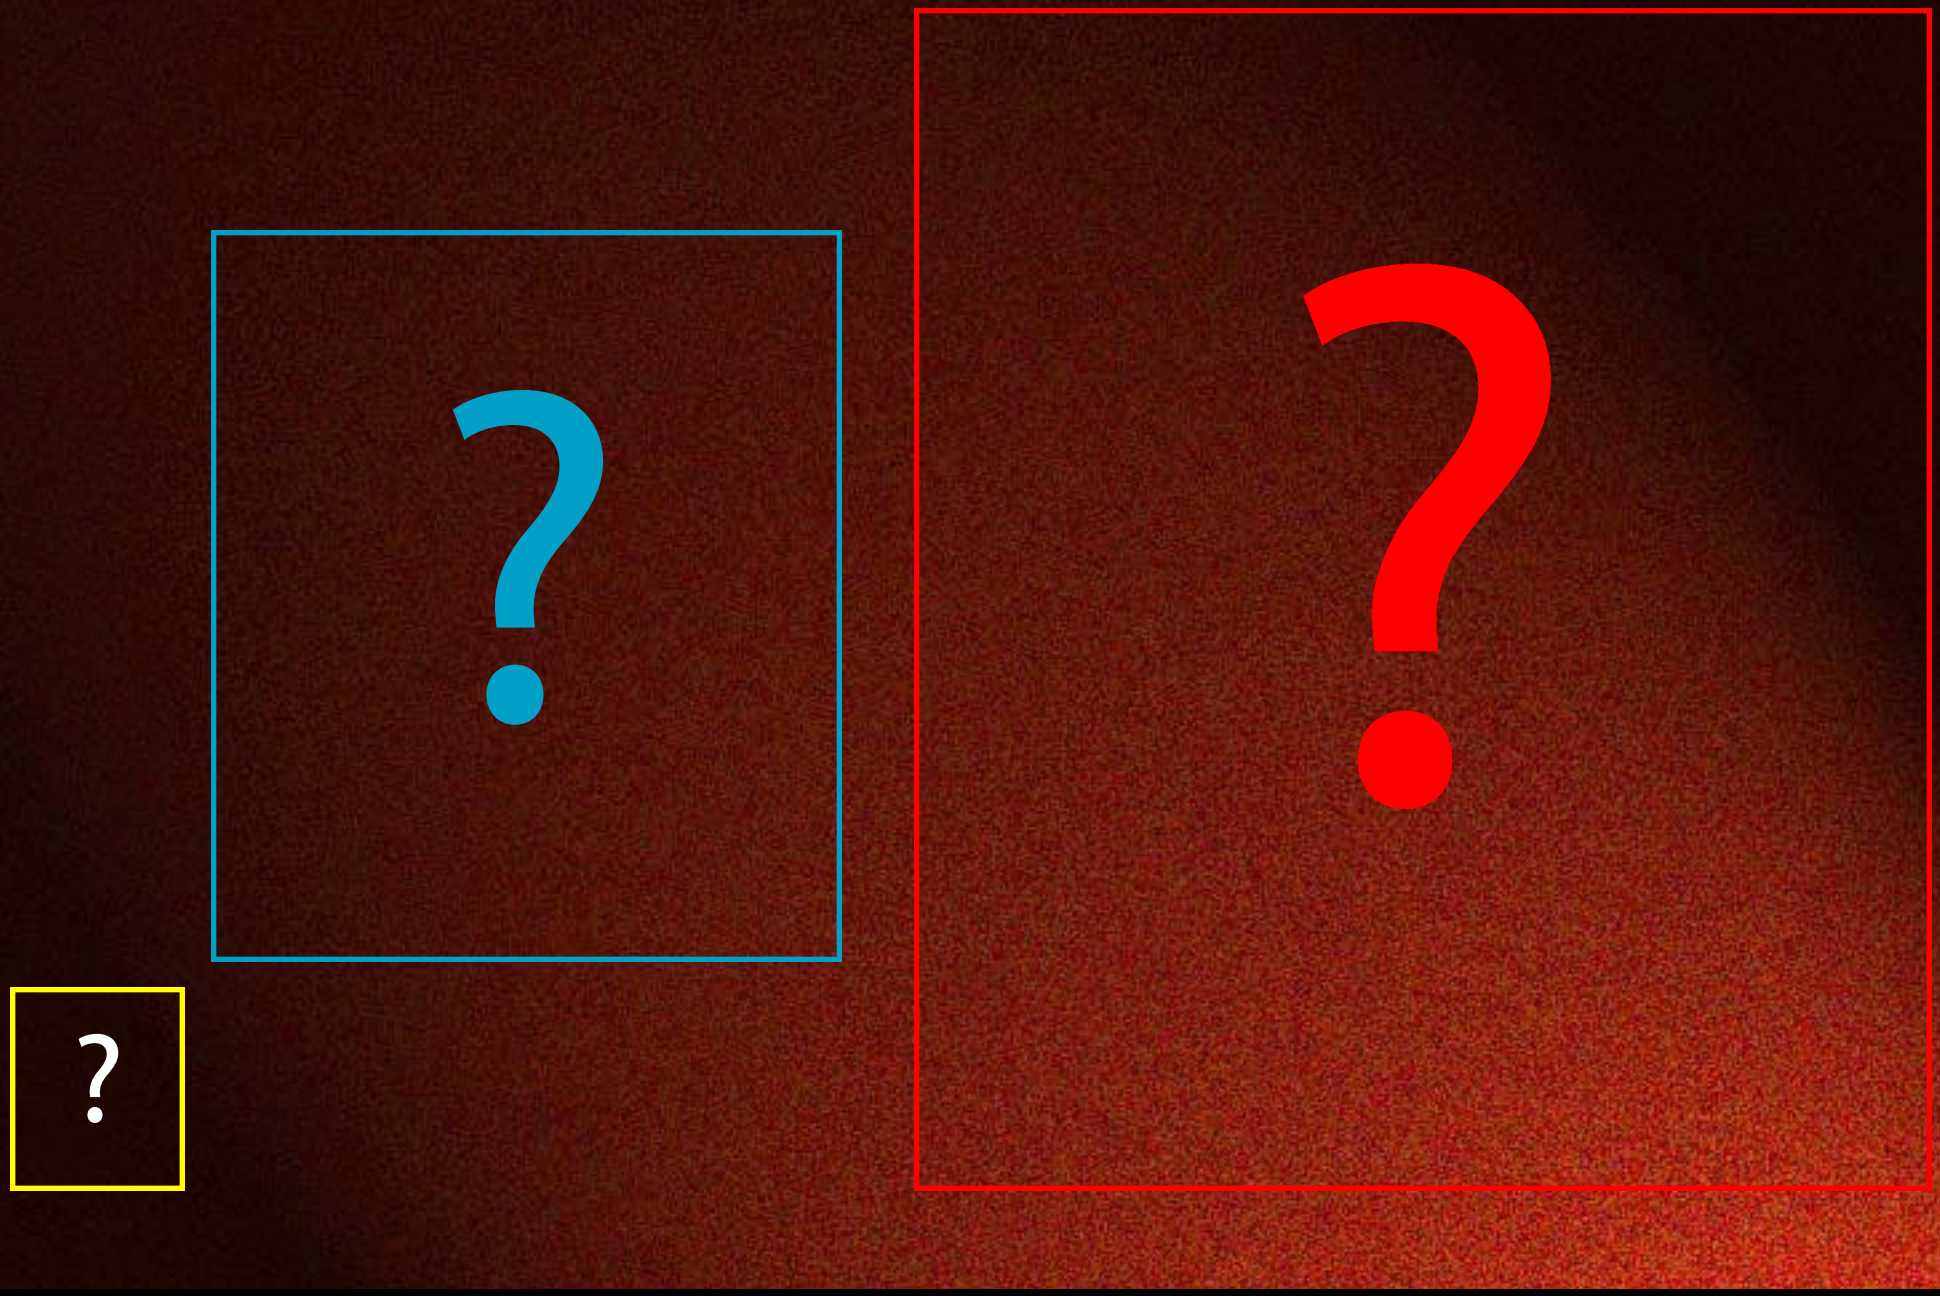


The World Embracing Hope Foundation is seeking, through a global competition, to find answers to the questions:

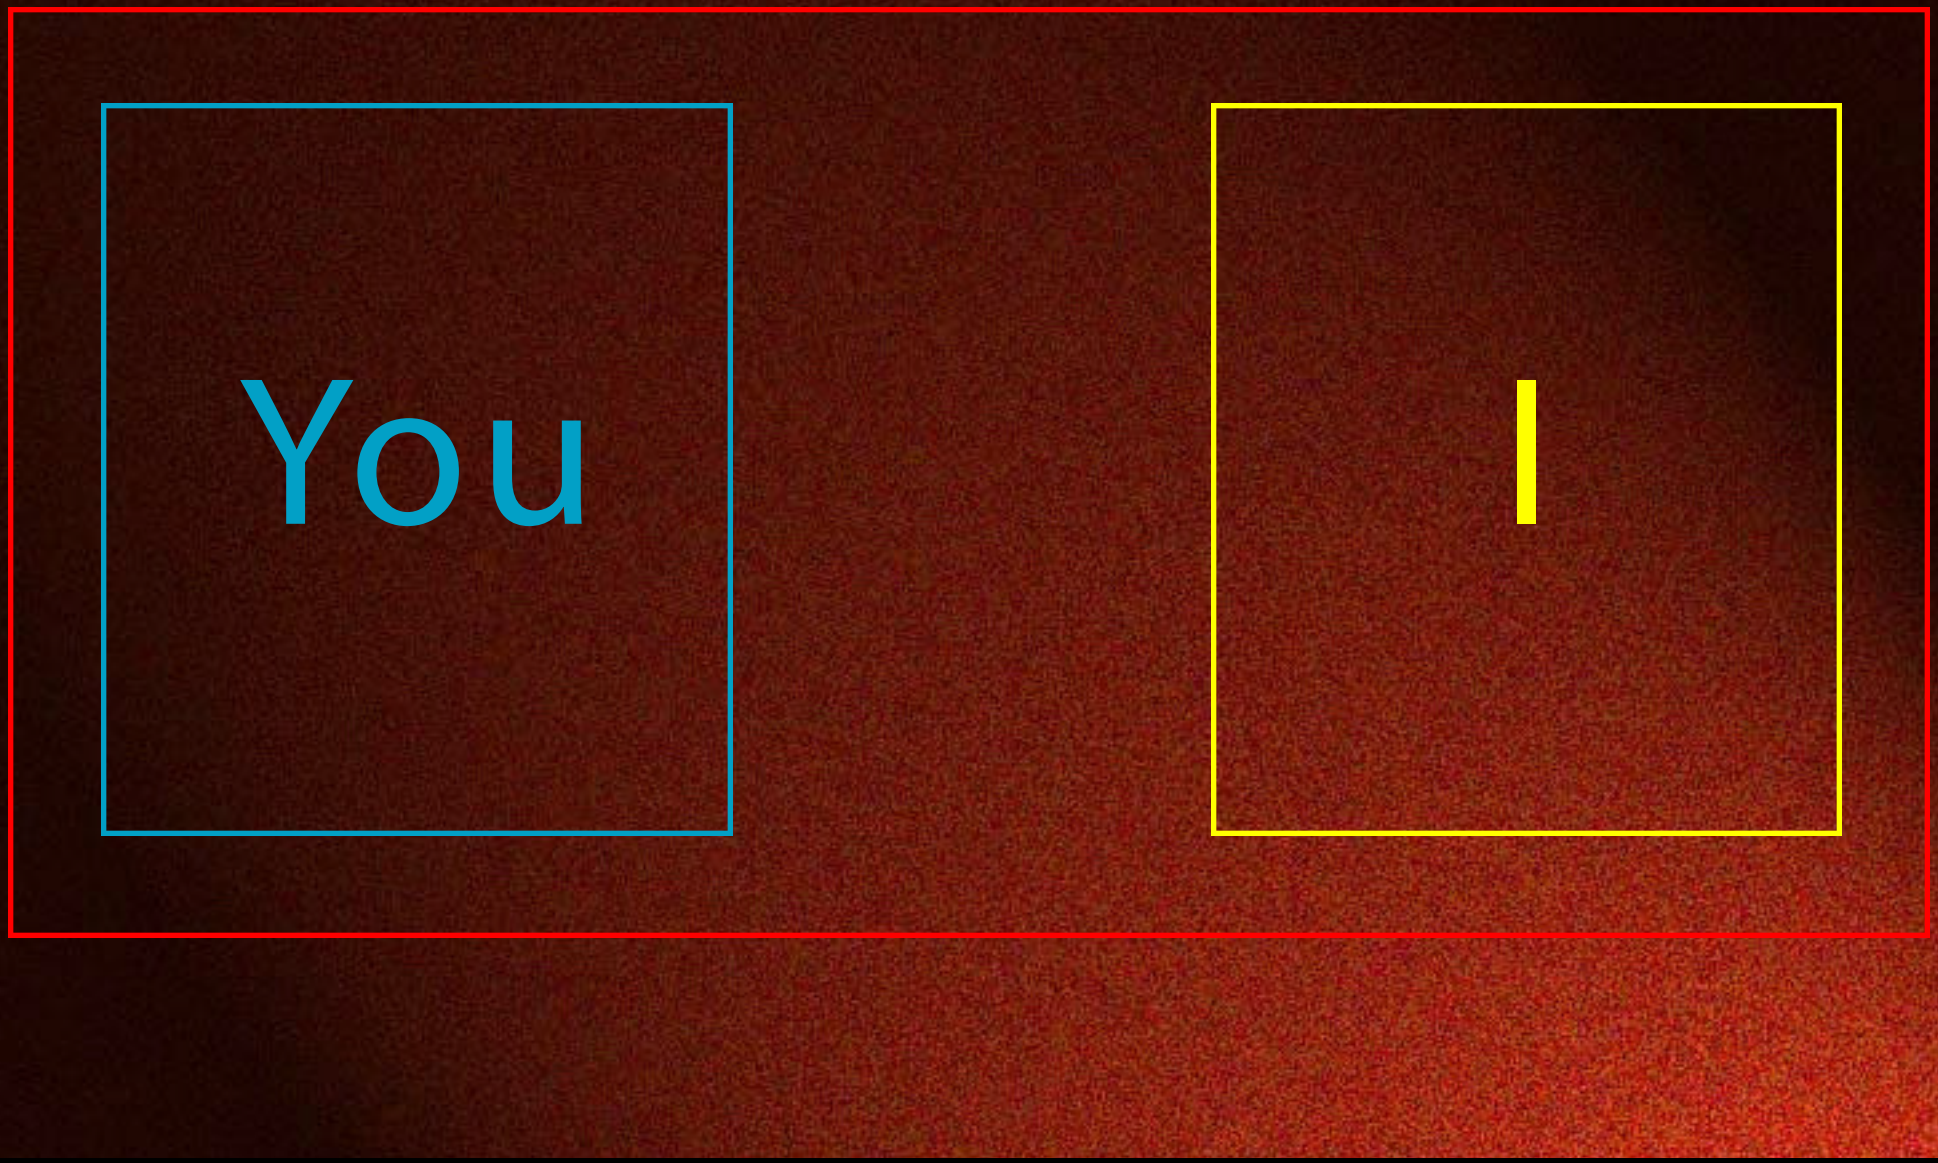
Where are we?

What are we?

and why do we exist?



And just who is it that may benefit from such an endeavor?

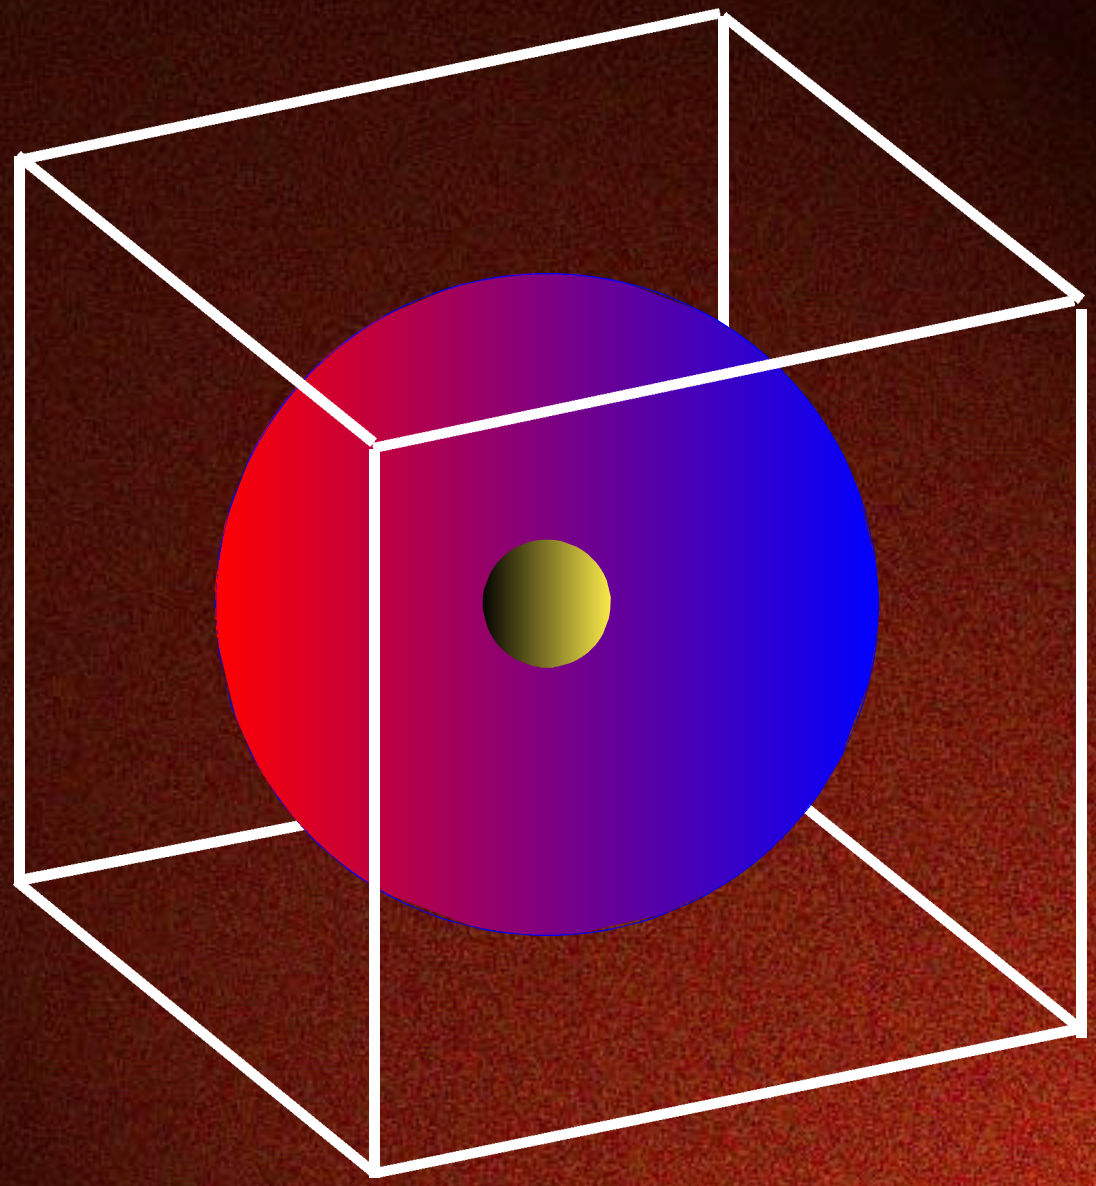


It is you and I who may benefit.

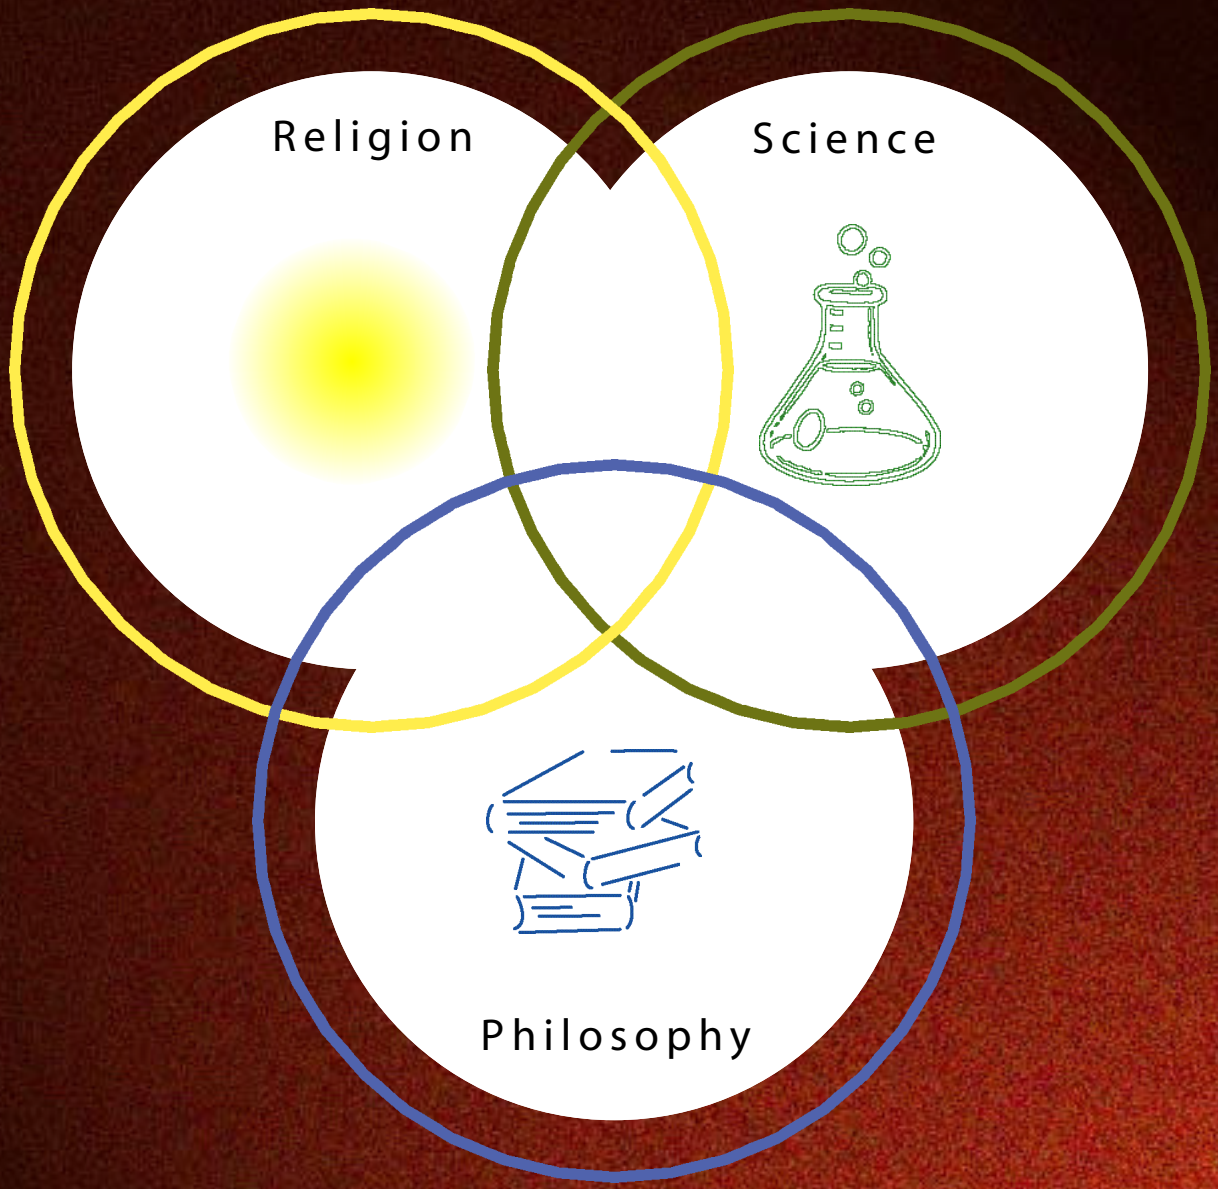
It is humanity who may benefit.

It is our Earth that may benefit.

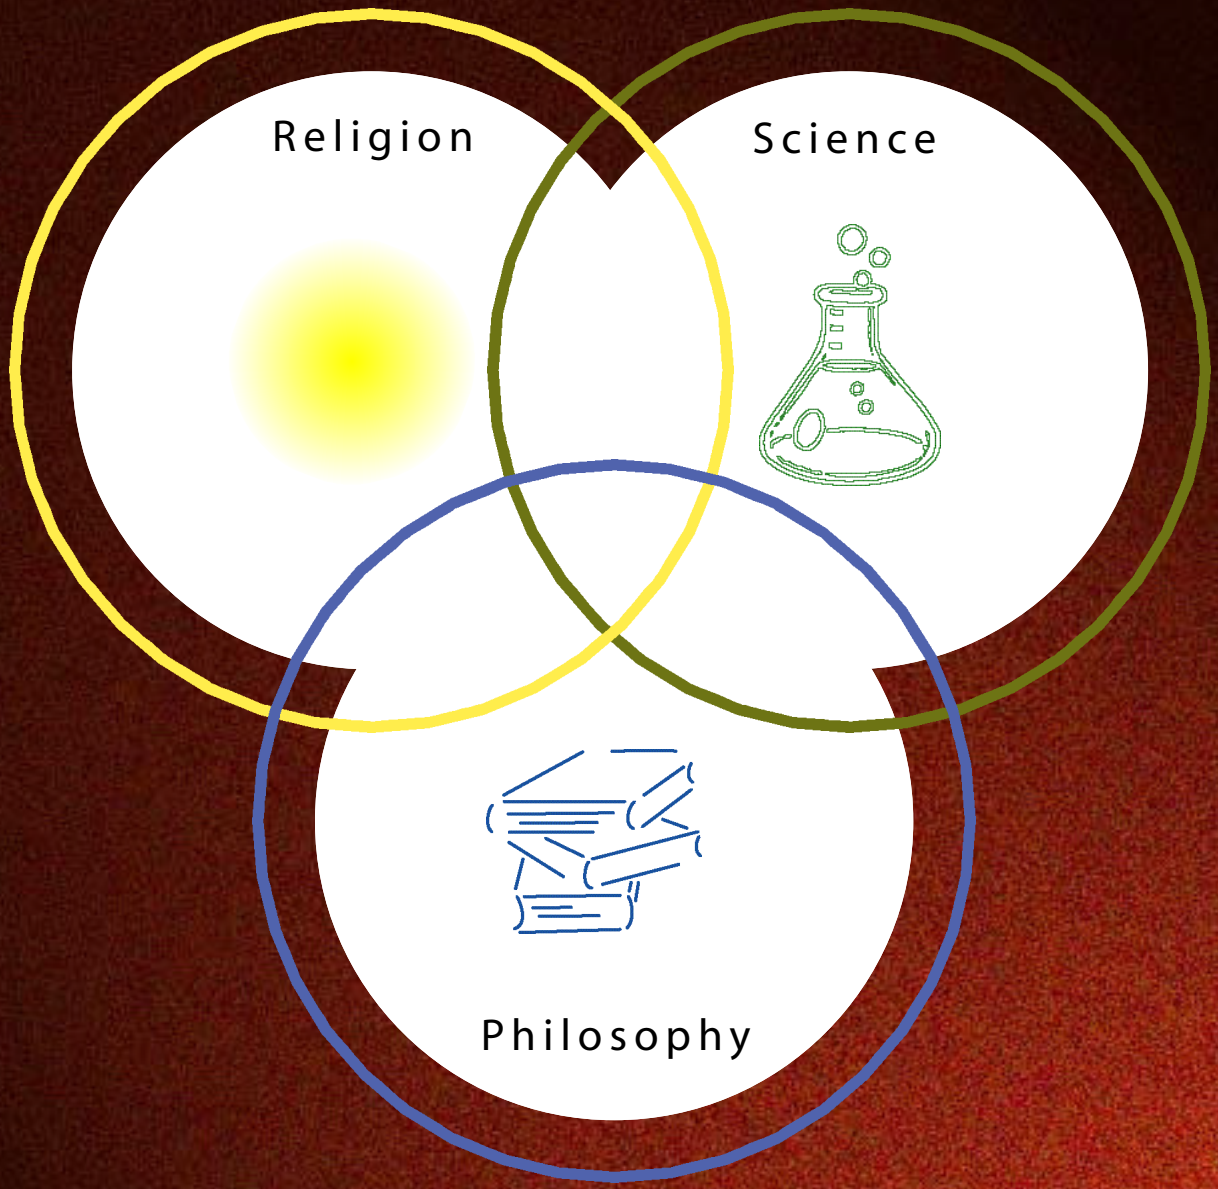
It is life, universally, that may possibly benefit.



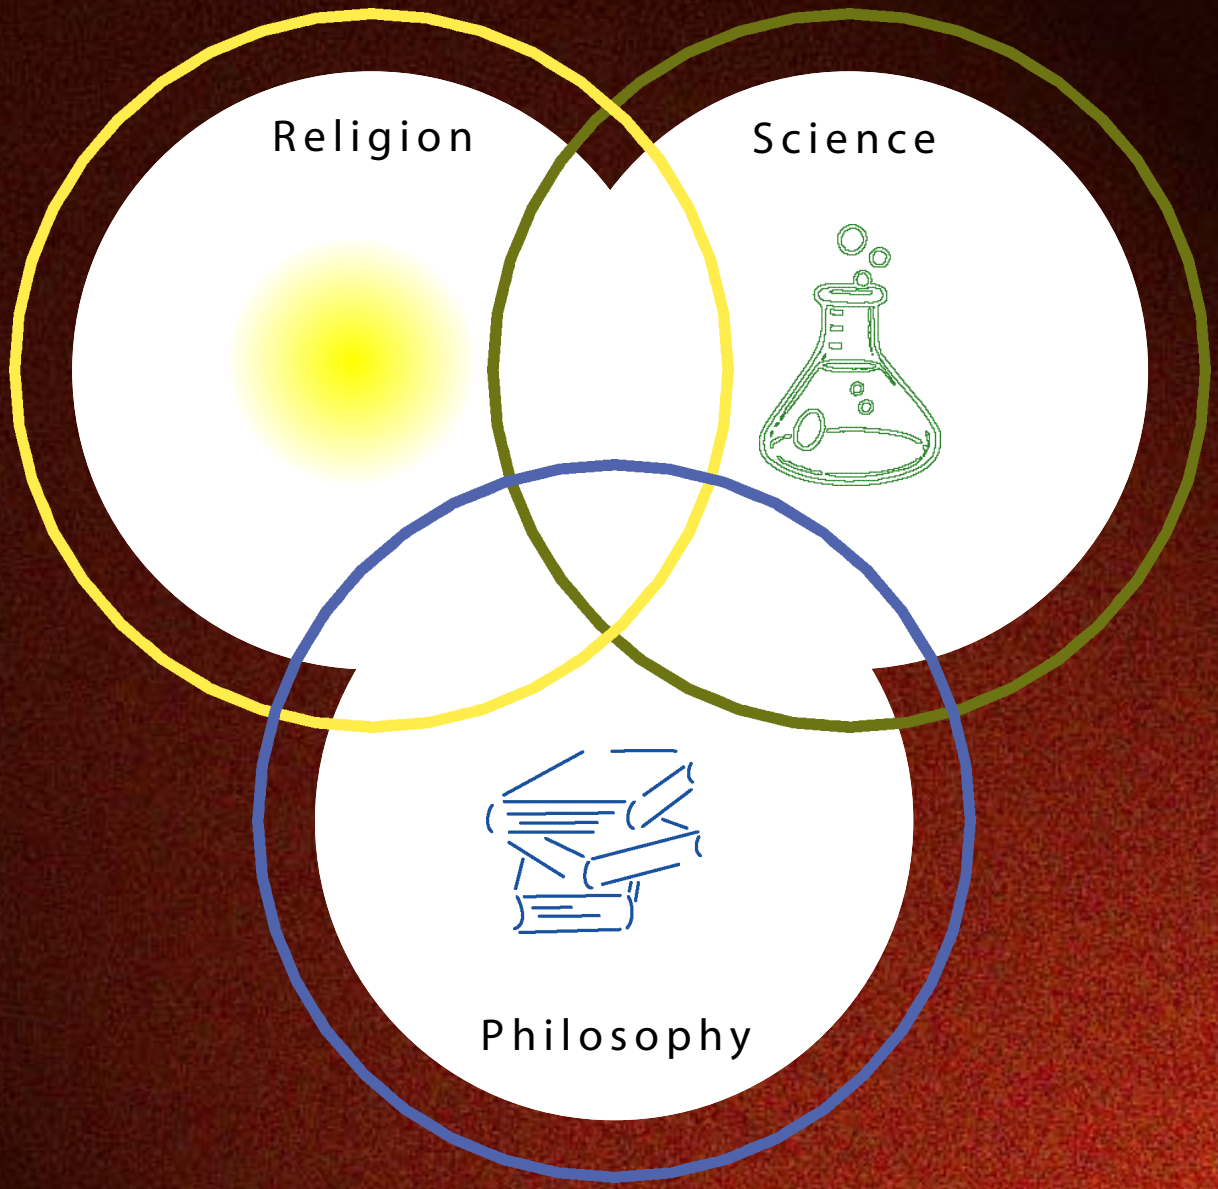
It is what lies beyond our Universe that may benefit from such a competition.



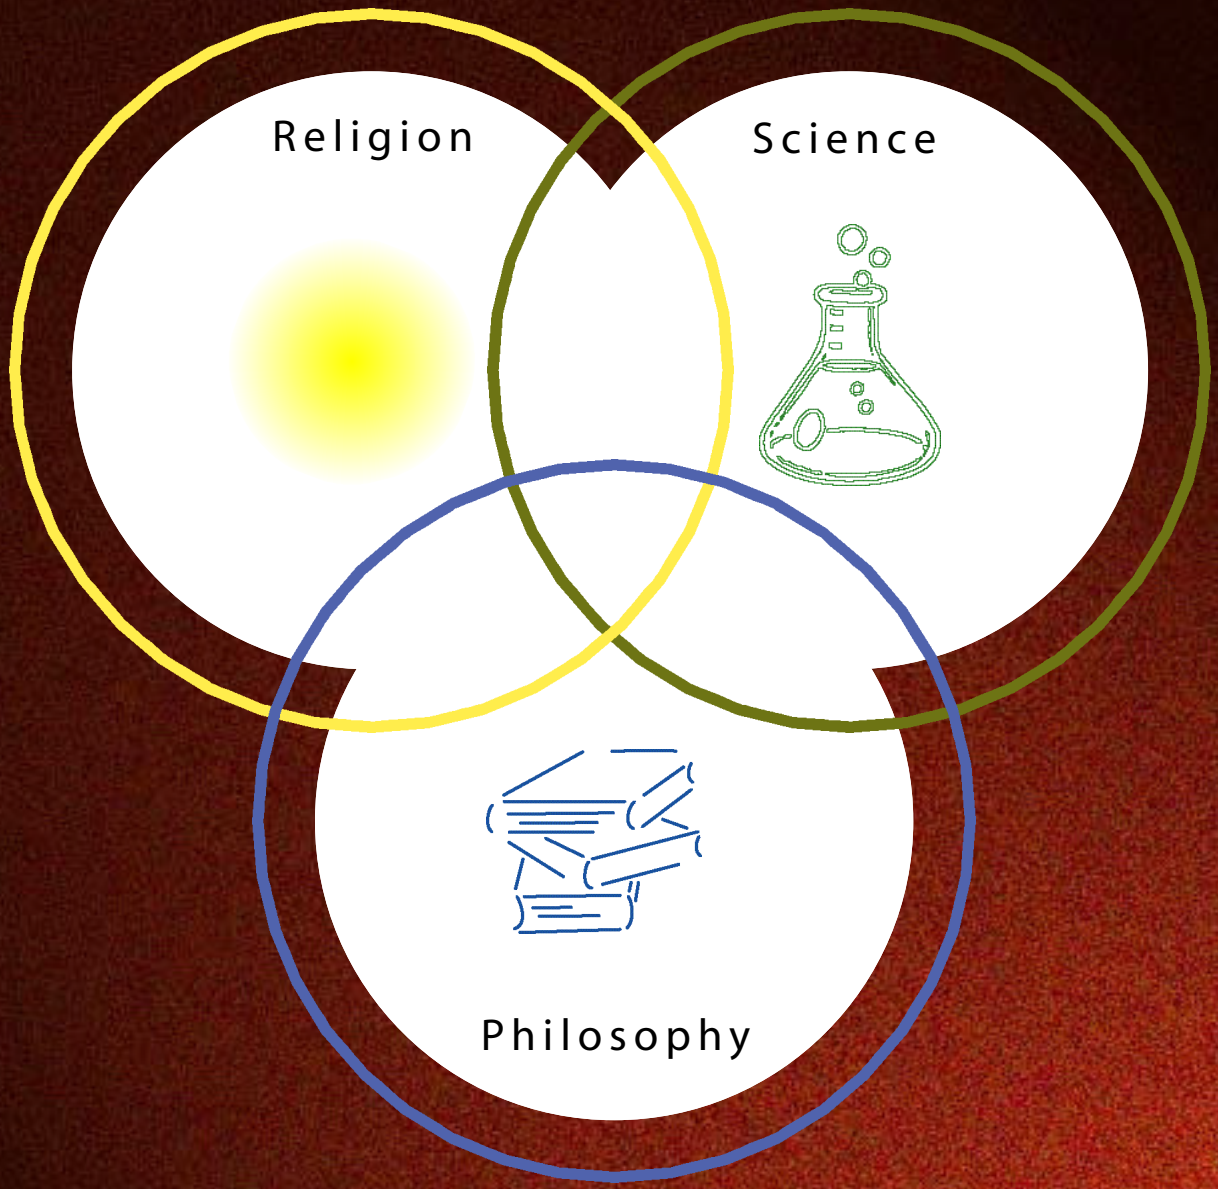
Why is the World Embracing Hope Foundation investing its energies and resources to host such a competition?



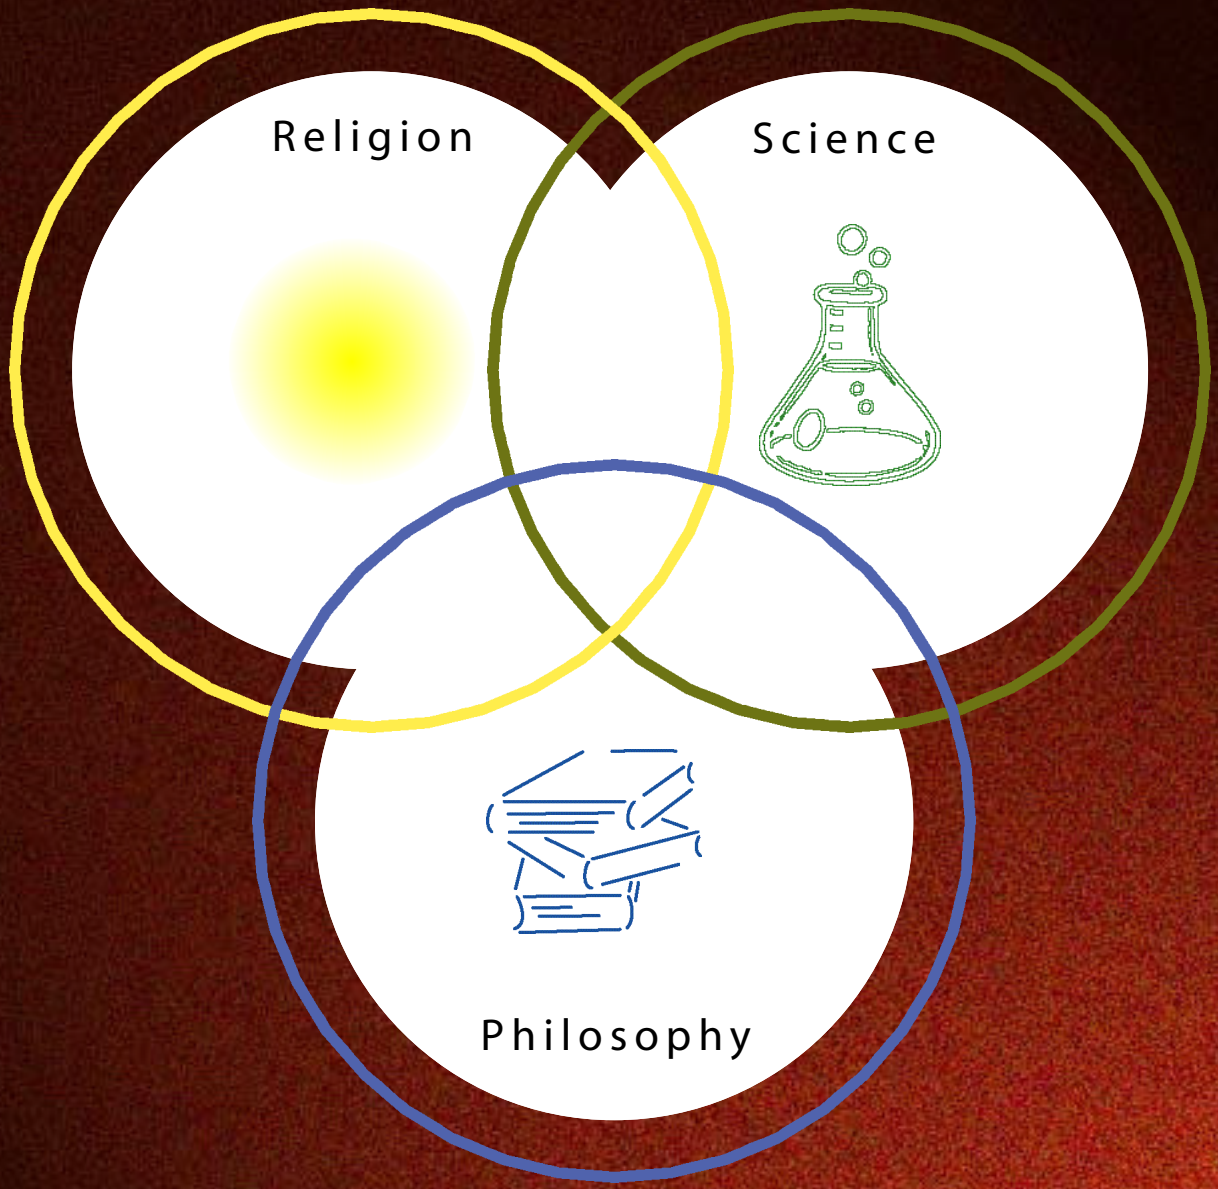
With such a broad range of positive possibilities, how could the Foundation do otherwise?



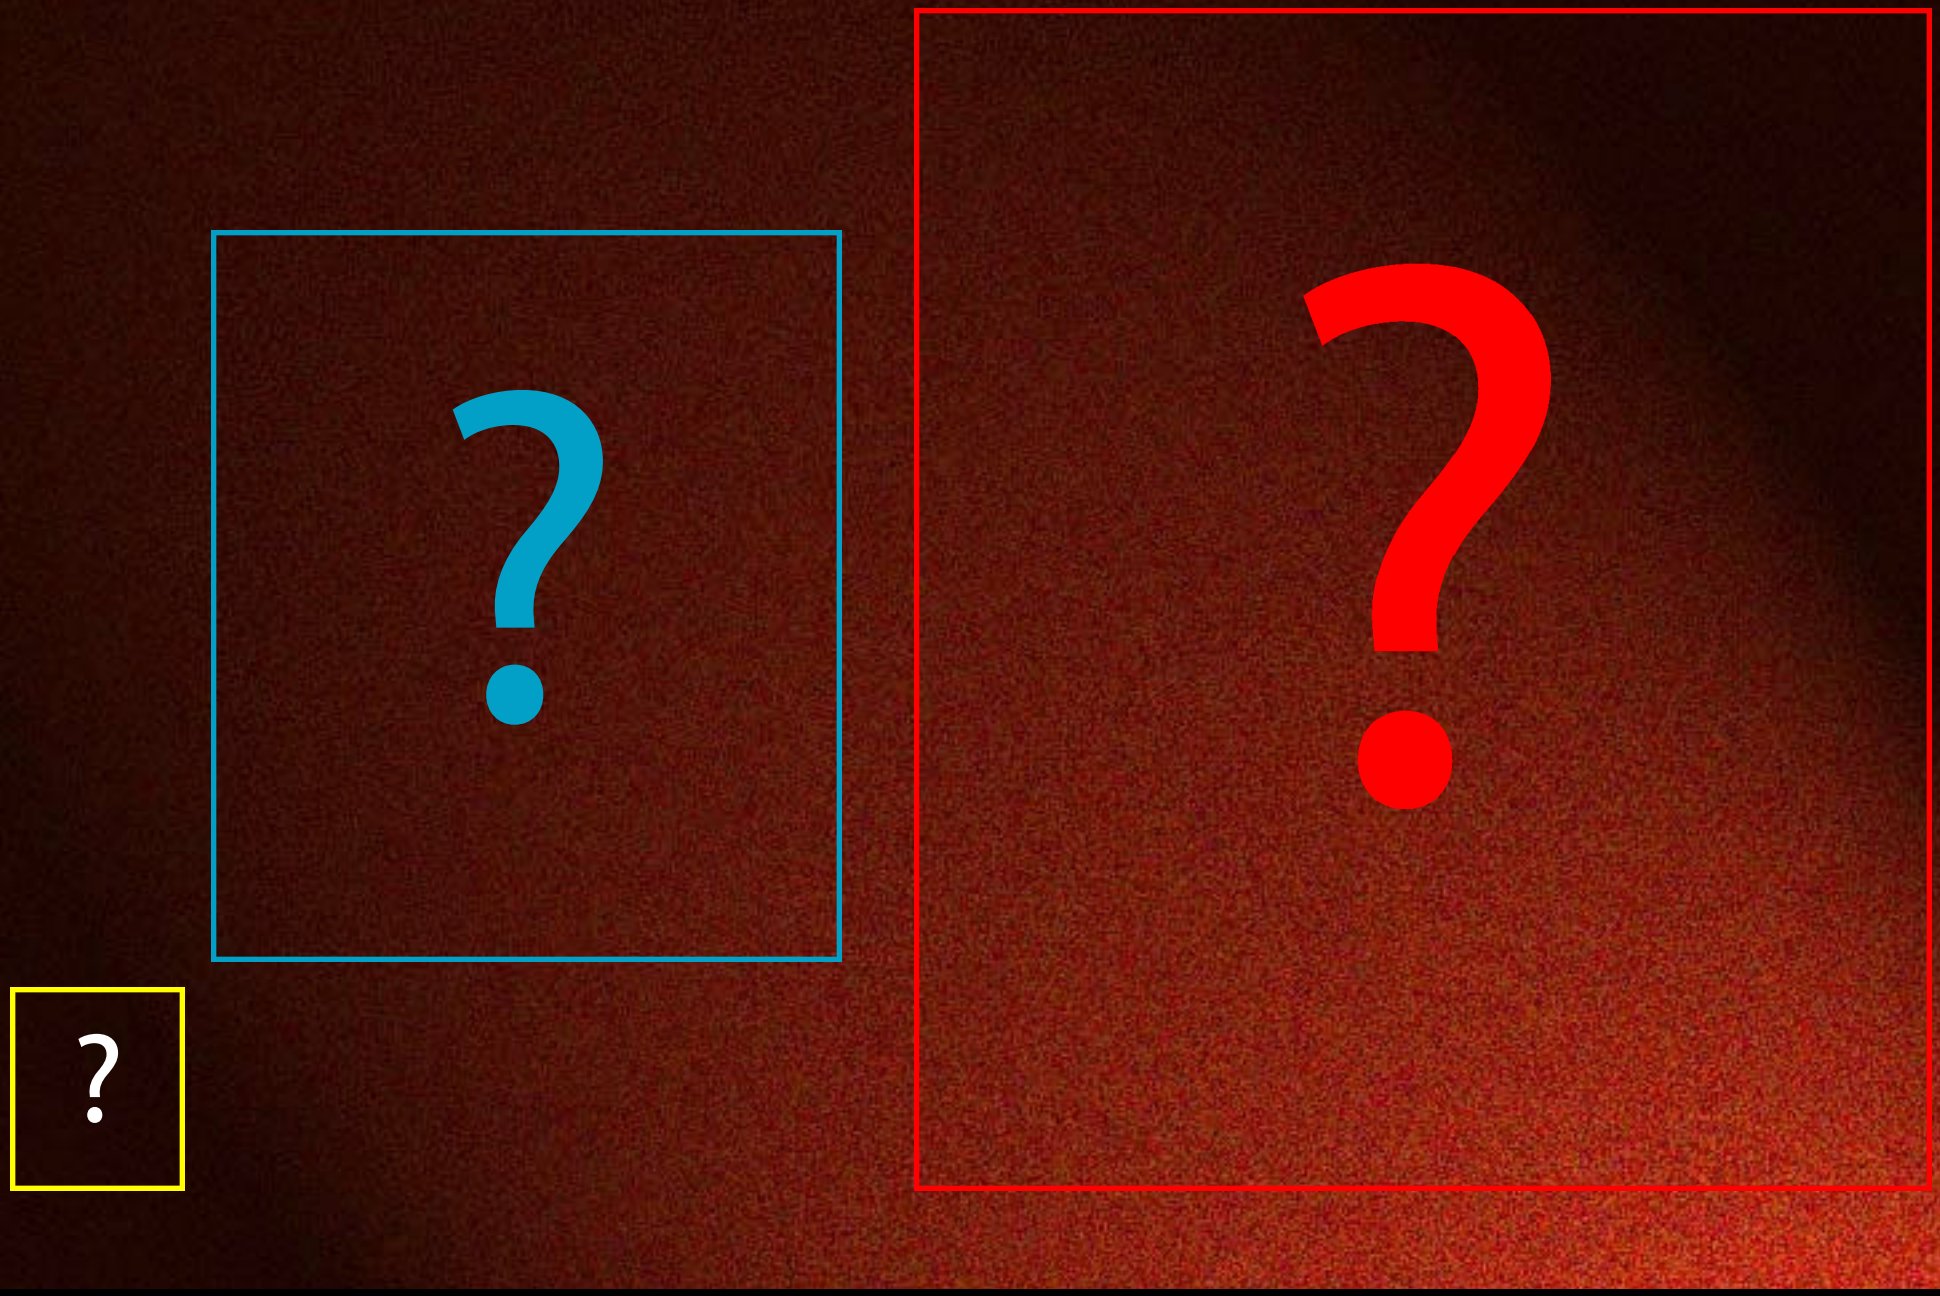
Irrespective of the probability of success, the positive possibilities make the debate worthwhile.



It is true that the World Embracing Hope Foundation could ignore the potential of this project and place its energy elsewhere.



But what if the potential for our species was not realized because the Foundation ignored the potential it knew existed?



What then?

- The course of human history has been a difficult one . . .
- It's lessons are obvious for anyone to see . . .

History gives us the answer.

Hatred

Racism

Genocide

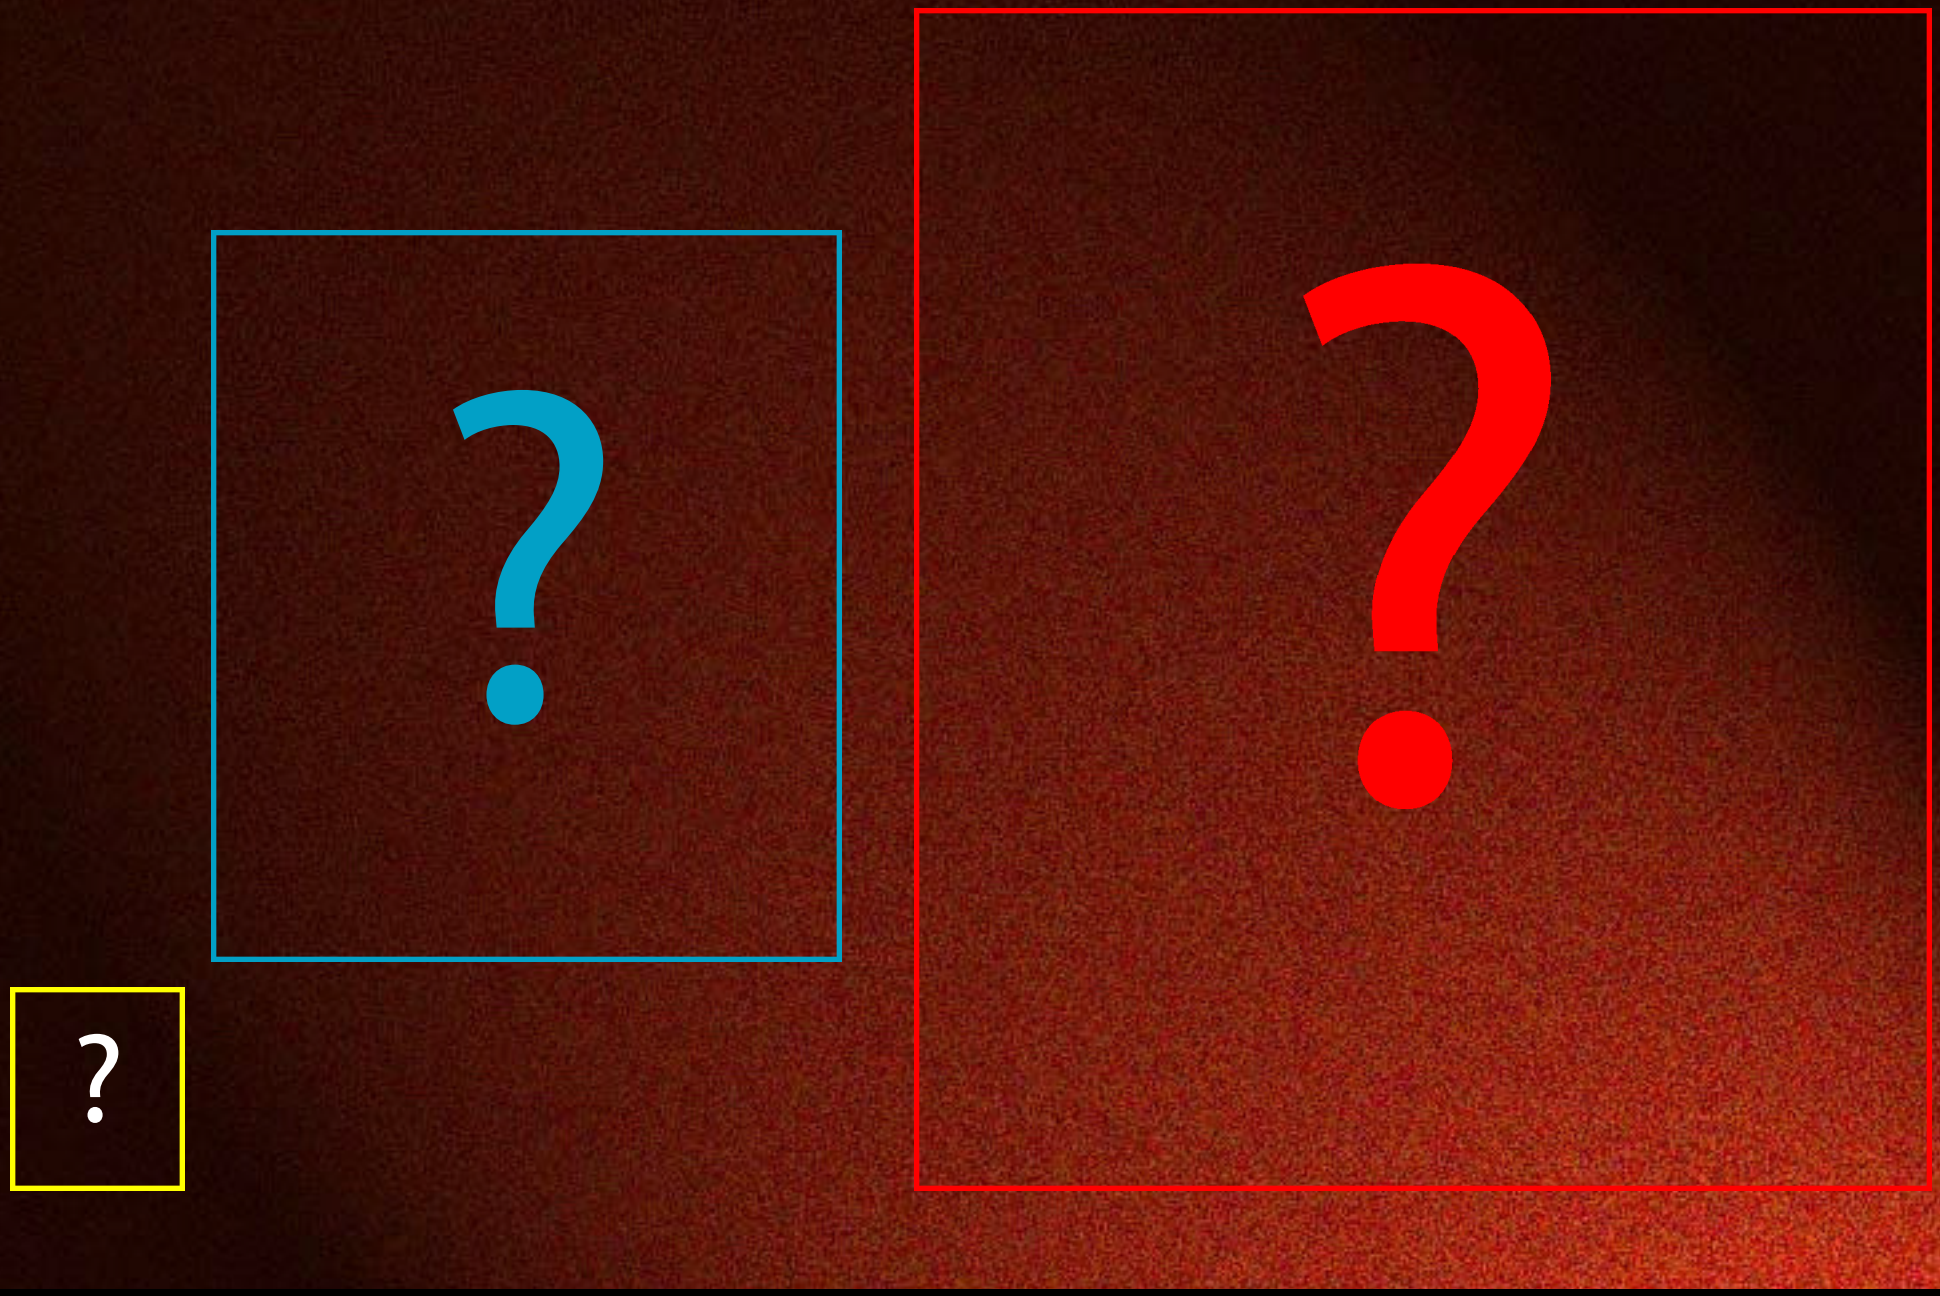
Violence

We will remain as we are and history will repeat itself.

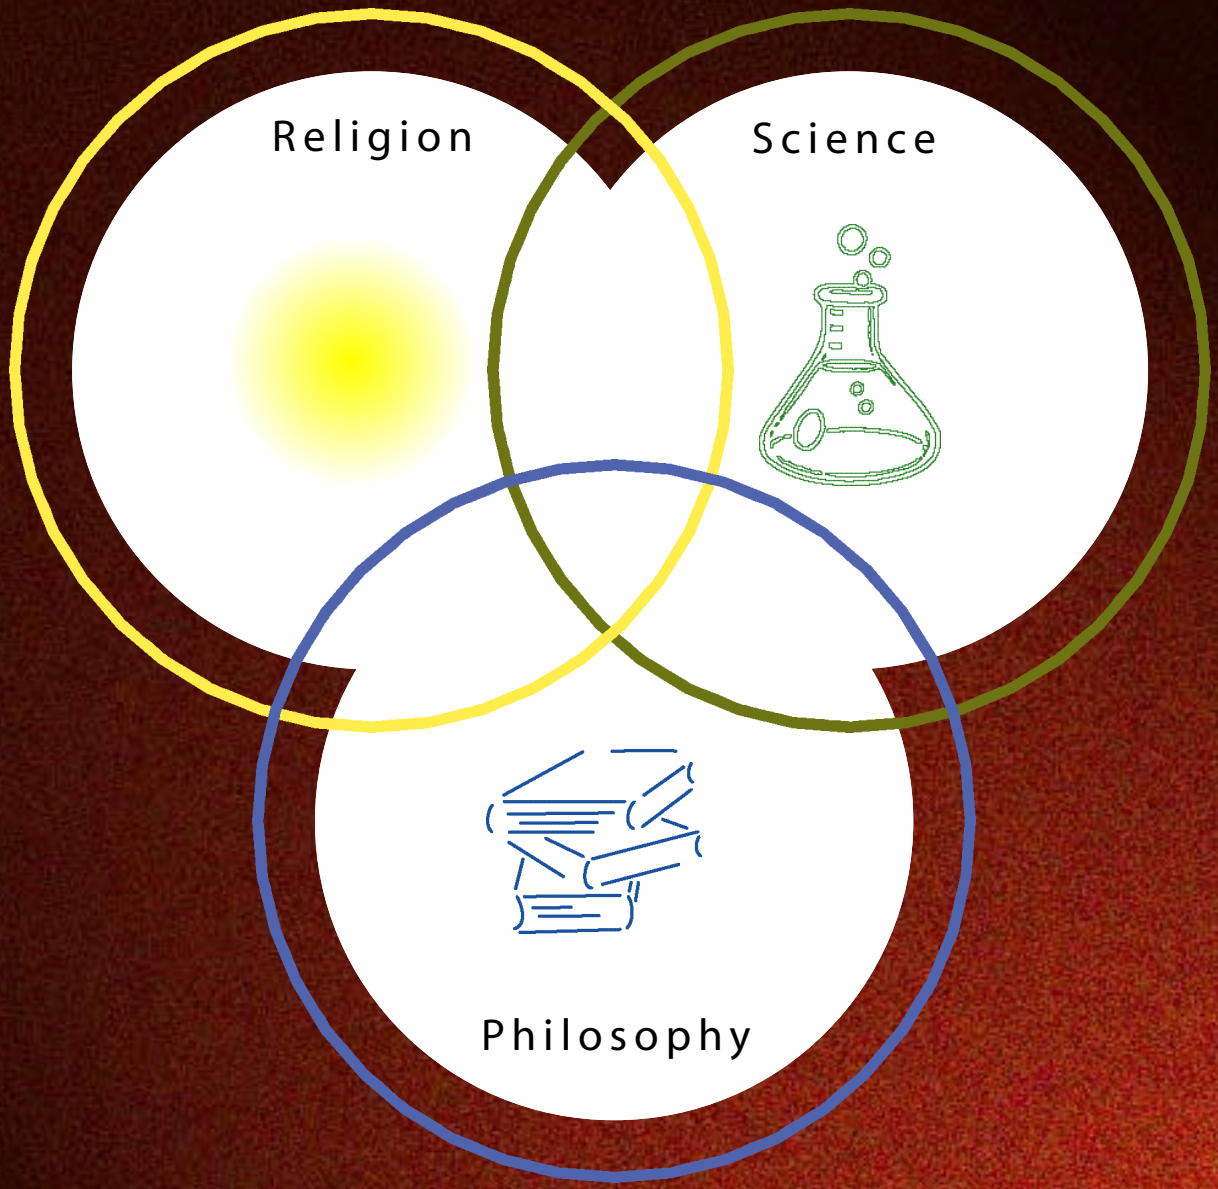
History will repeat itself, unless . . .

- Things change
- We change our perspective
- We change our model of who it is we perceive ourselves to be and why it is we perceive we exist.

Unless we change, history will not be denied.



But what if we do not have free will to change?



Then, ala determinism, the Foundation has no choice but to proceed with the competition it had intended to initiate.

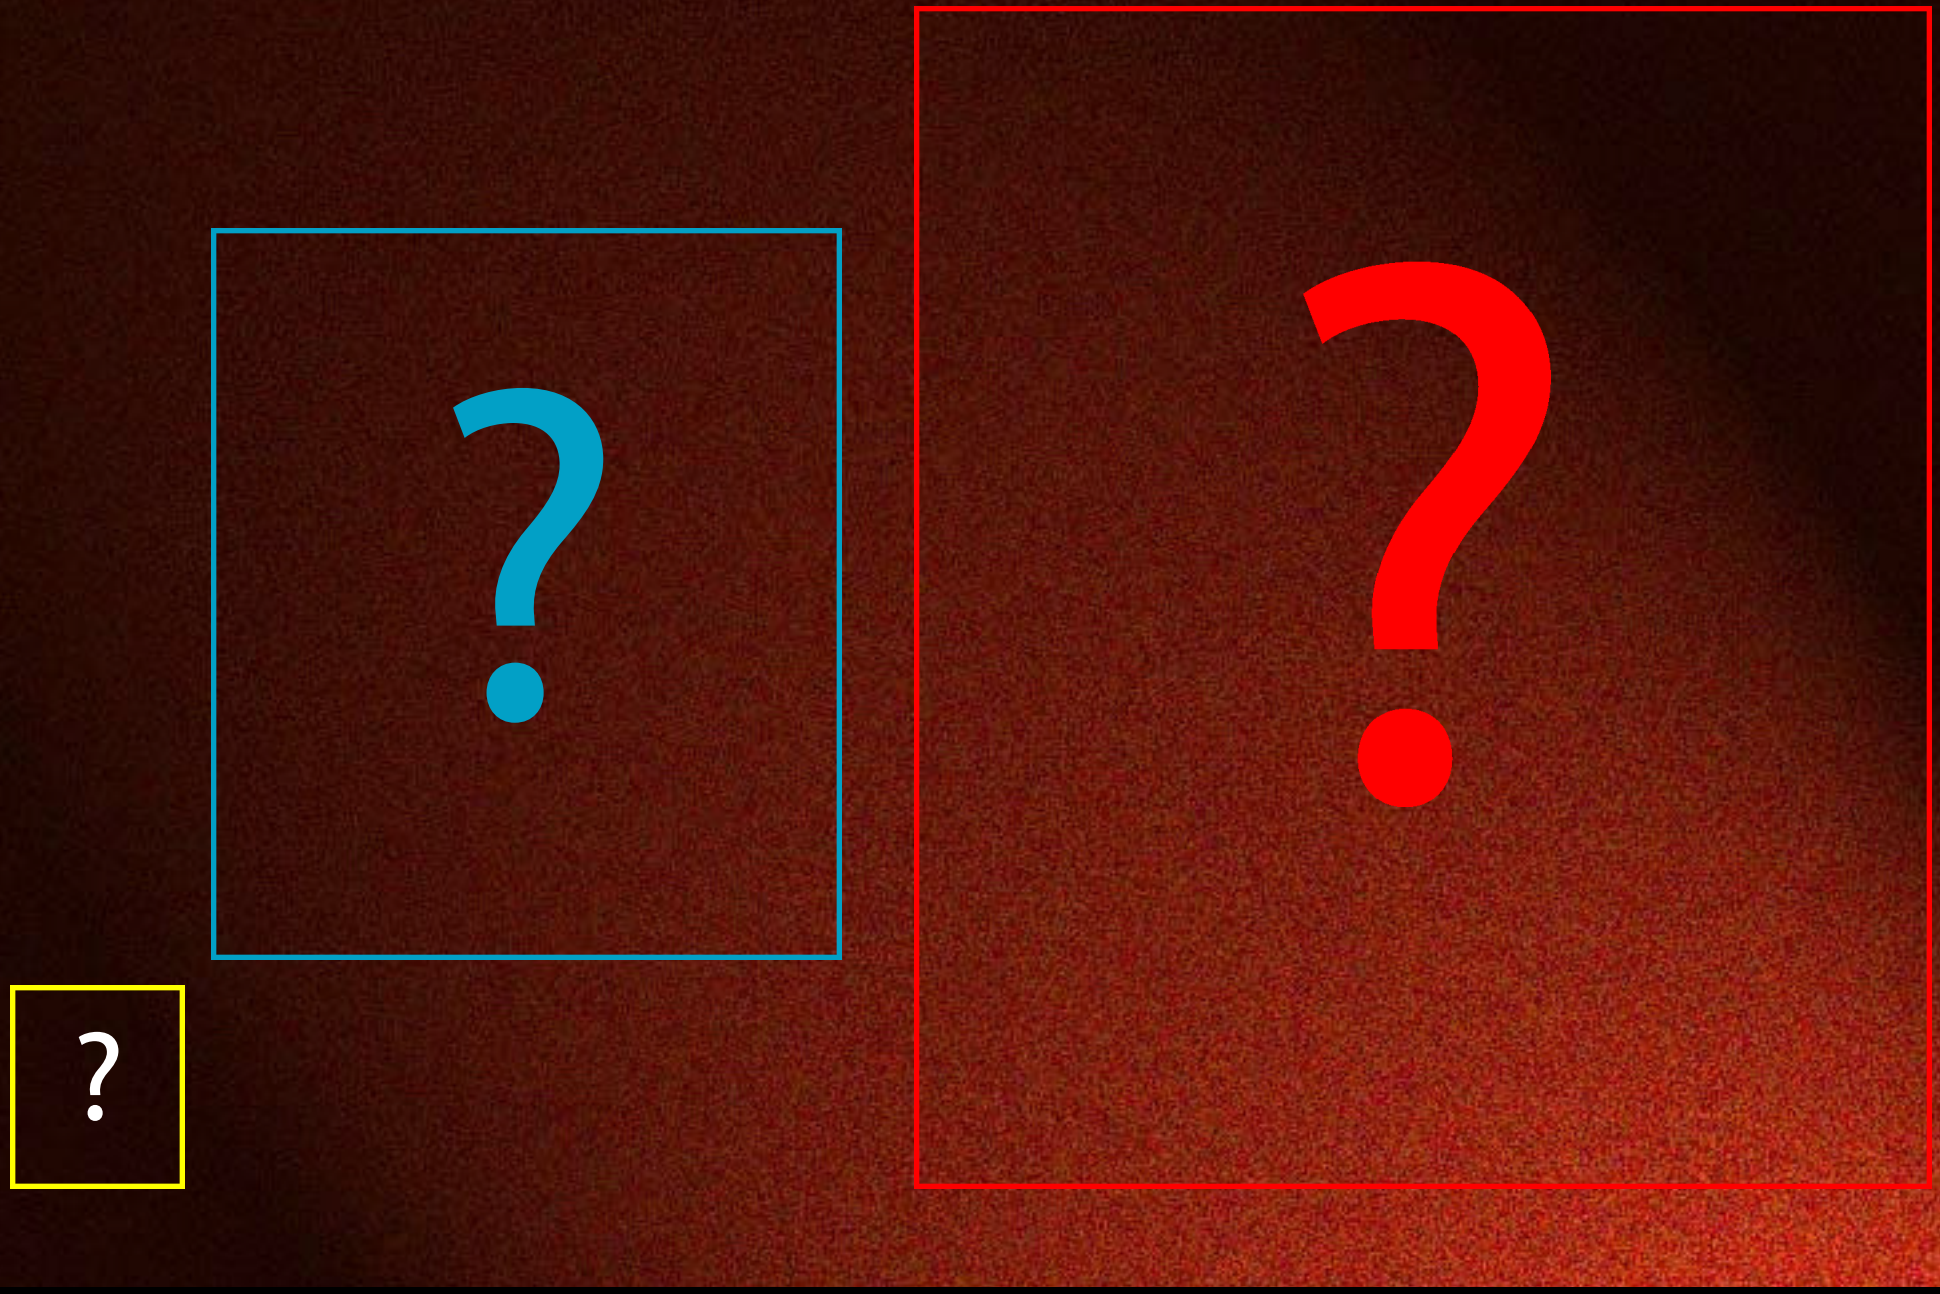
We can decide to define ourselves . . . or

Lost

Confused

Undefined

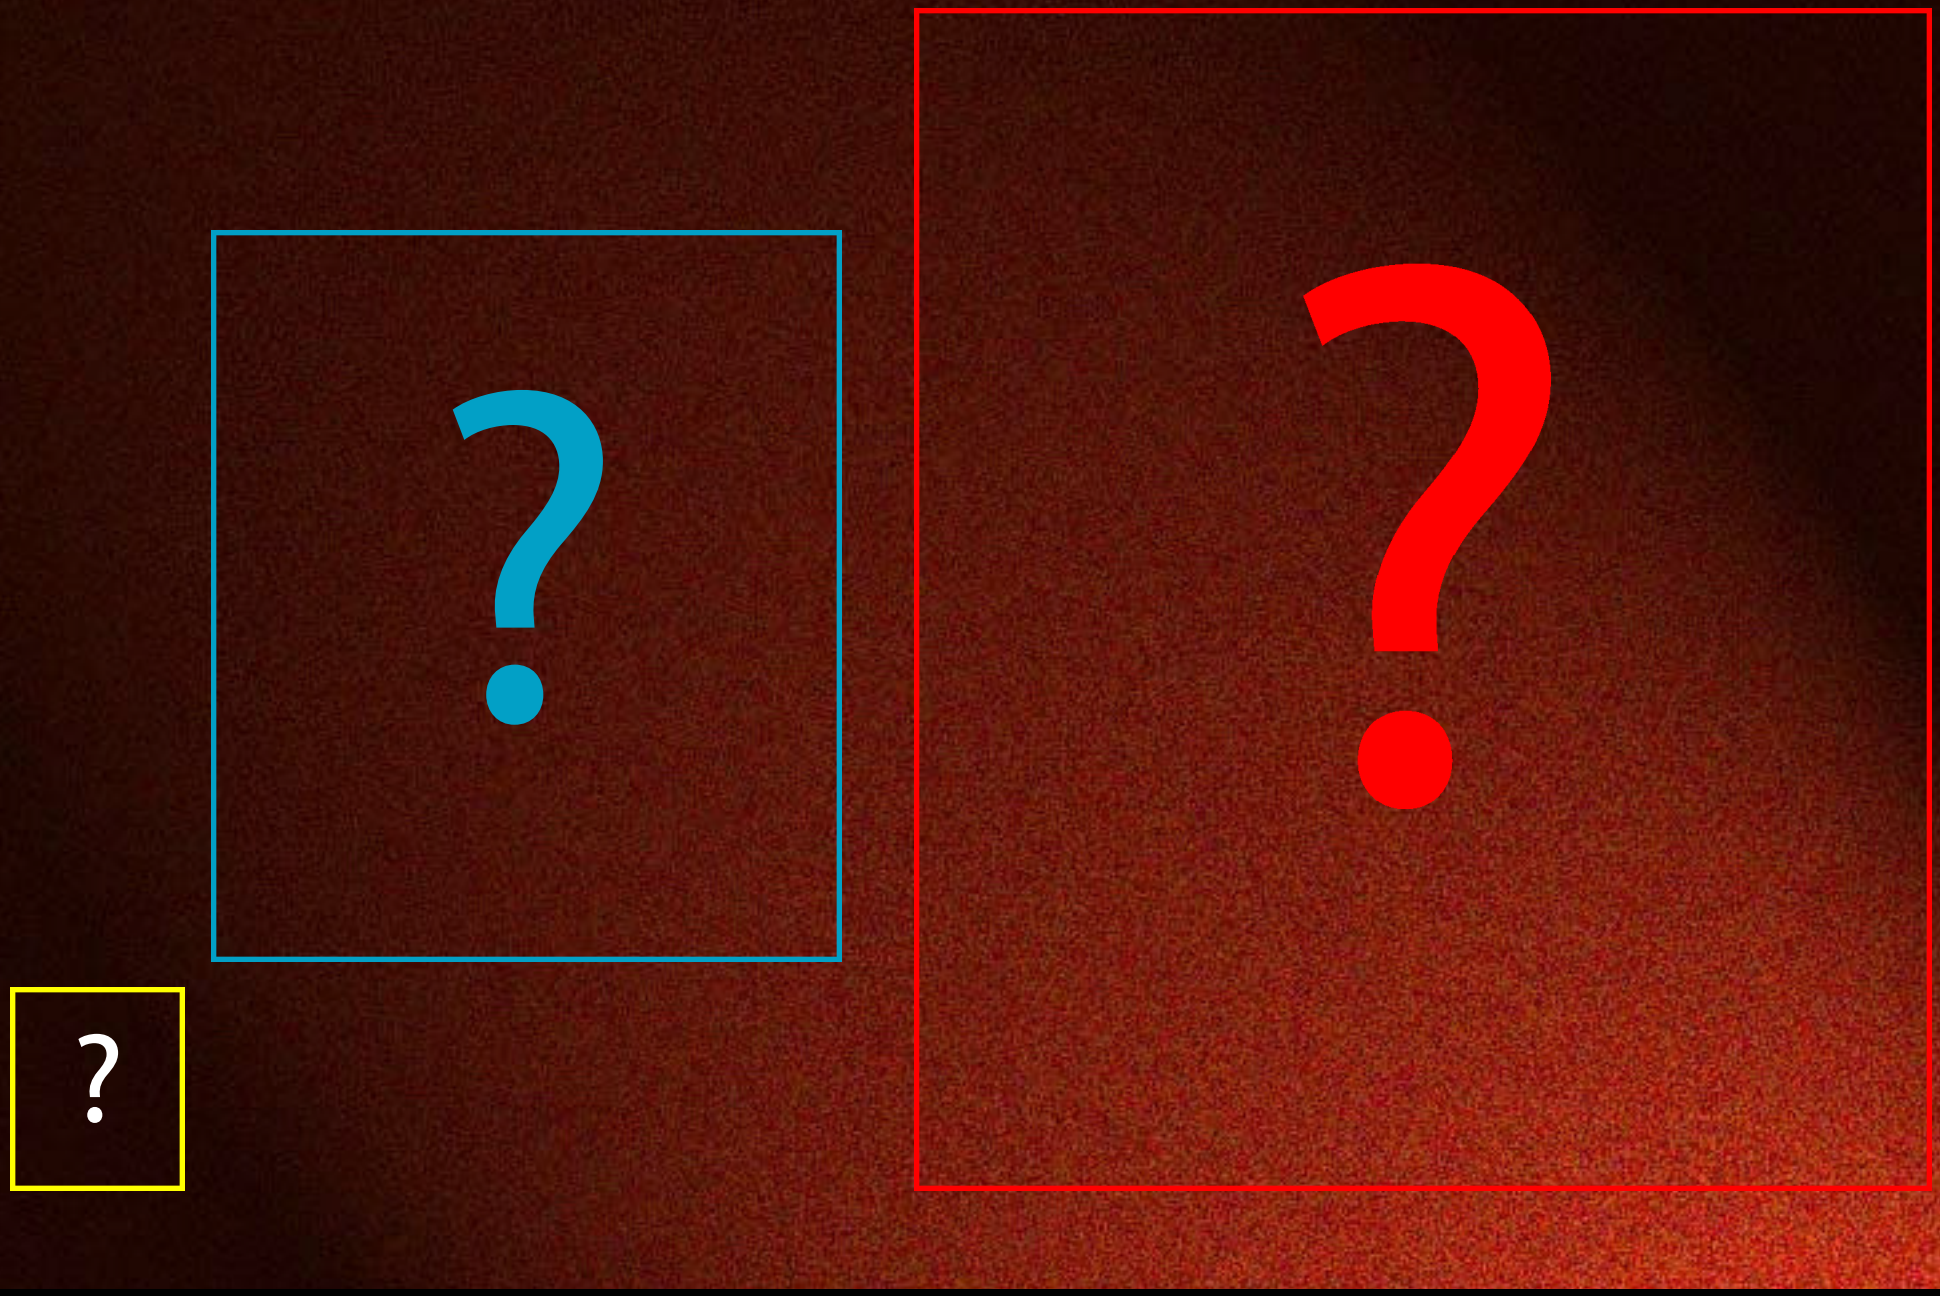
we can decide to continue as we are - undefined . . .



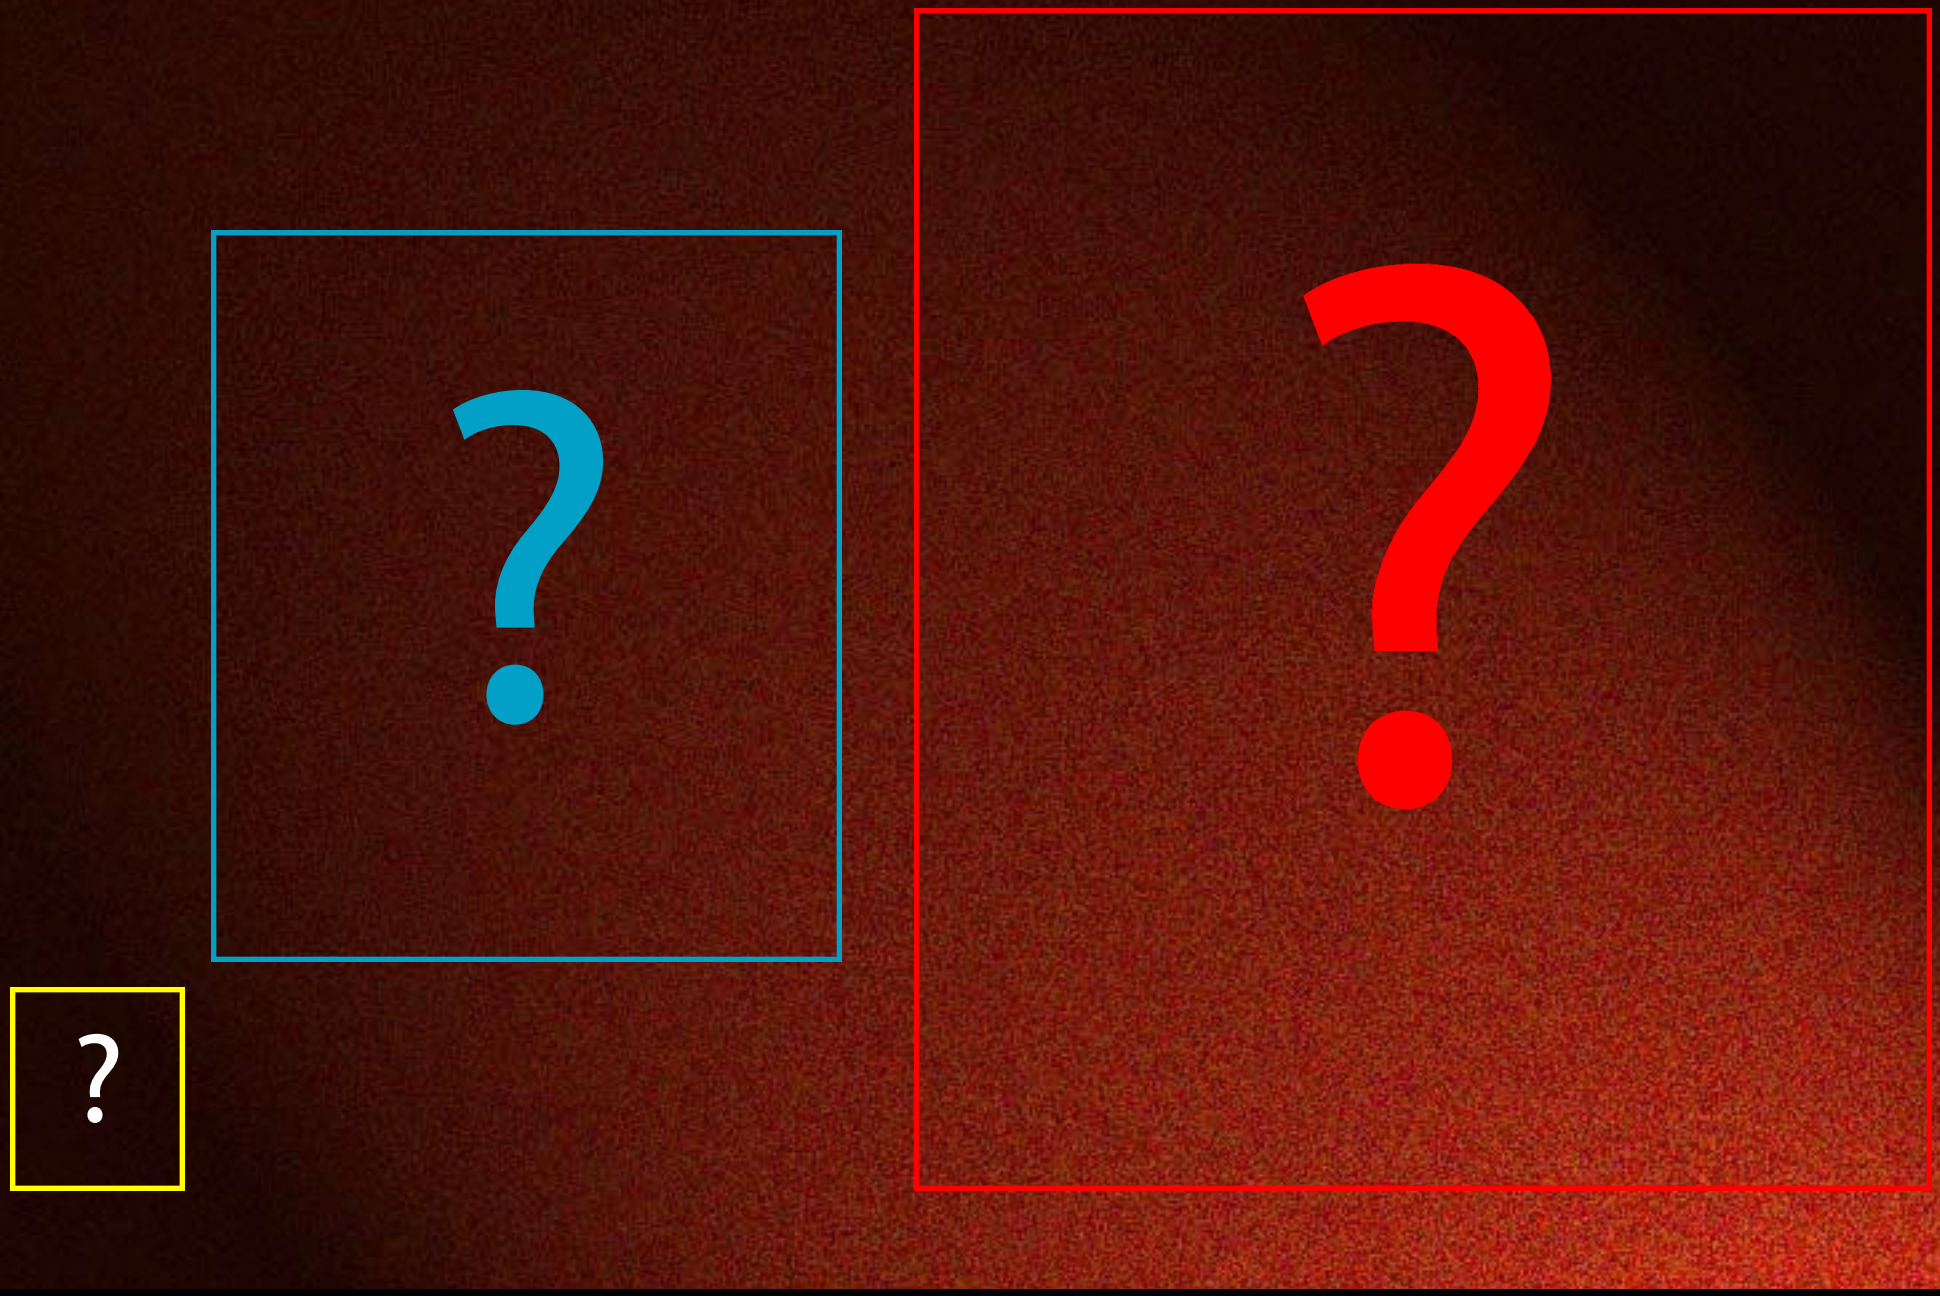
We can decide to continue as we are, which means we will continue to act as we do. It is our choice . . .

- Yours . . .
- Mine . . .
- Ours Together . . .

Yours and mine.



If we should decide to remain undefined
then not only will we continue to act as we do, but



someday somebody will come along and
define who we are for us.

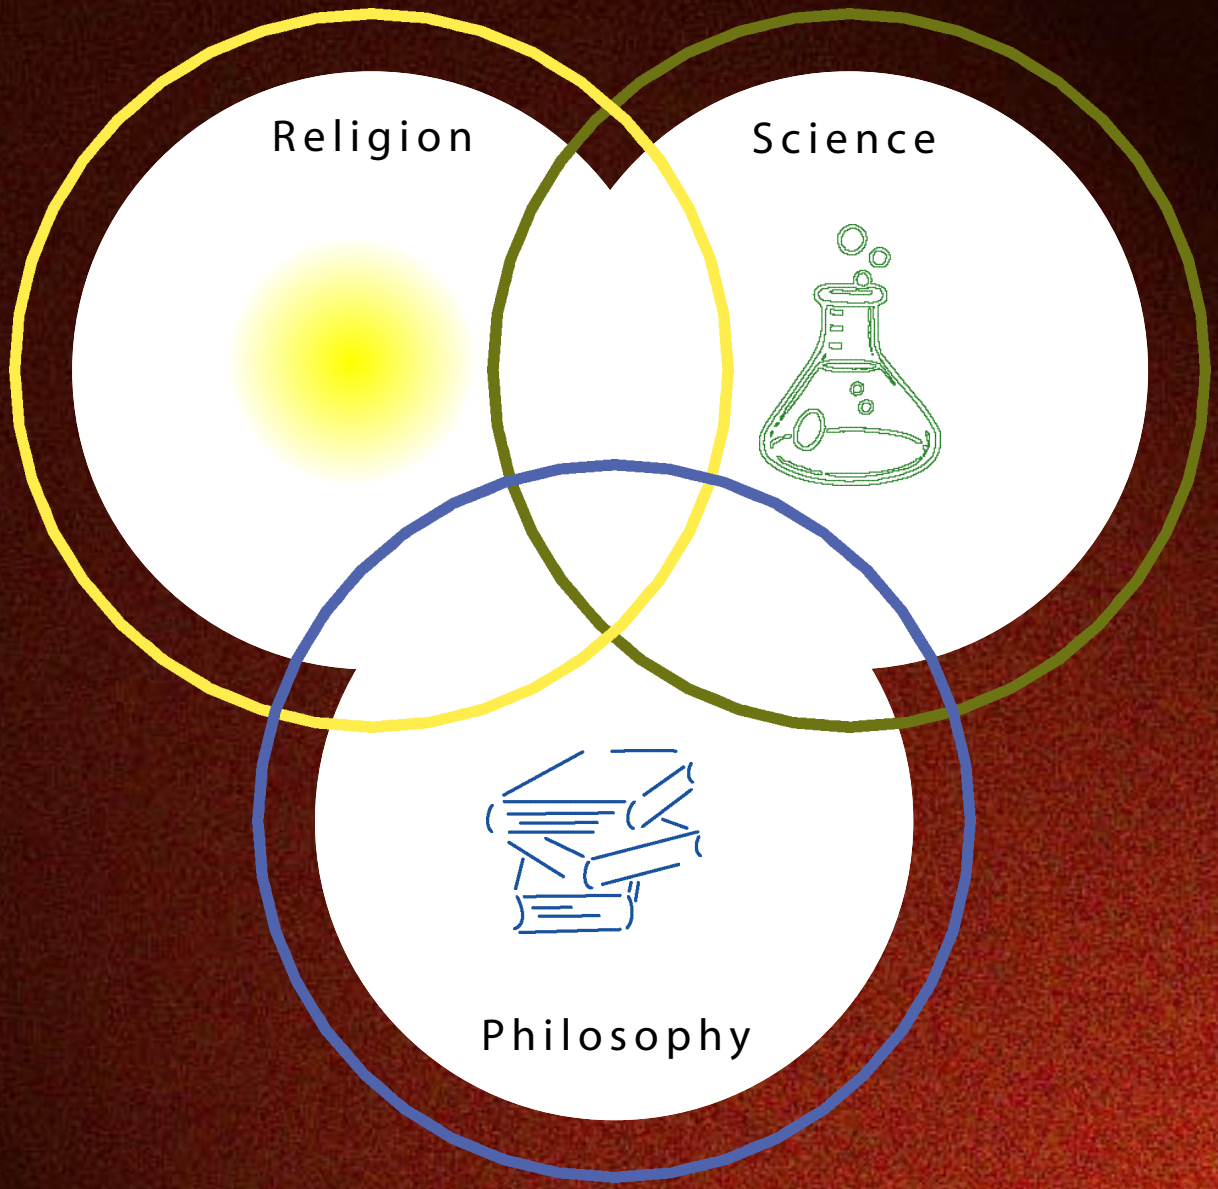
That somebody may not come from our own Earth

That somebody may not come from our own Solar System,

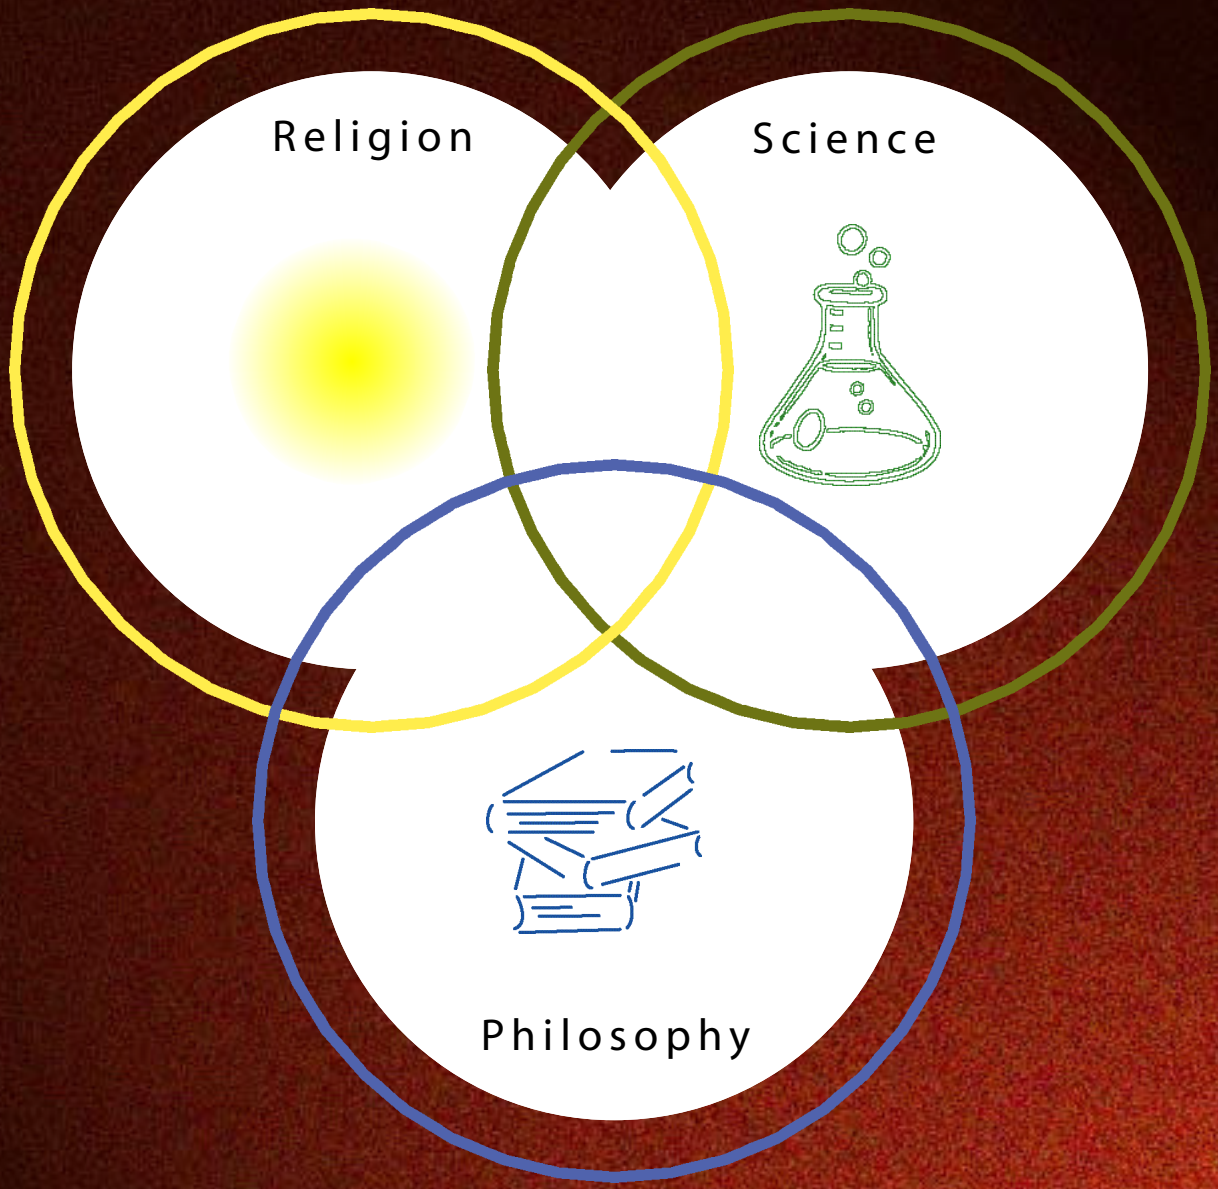
nor our own Galaxy.

- Either we will do it, or . . .
- Someone else will do it for - and to - us . . .

It is the hope of this Foundation that we will control this process ourselves.



It is the hope of the World Embracing Hope Foundation that we will



be the ones to control this process, that we will do the defining.

- To maintain our access to free will.

It is the sole purpose of the World Embracing Hope Foundation
to maintain our access to free will.

- To keep our species free.

It is the sole purpose of the World Embracing Hope Foundation
to keep our specie free.

Thank you

for coming to this
