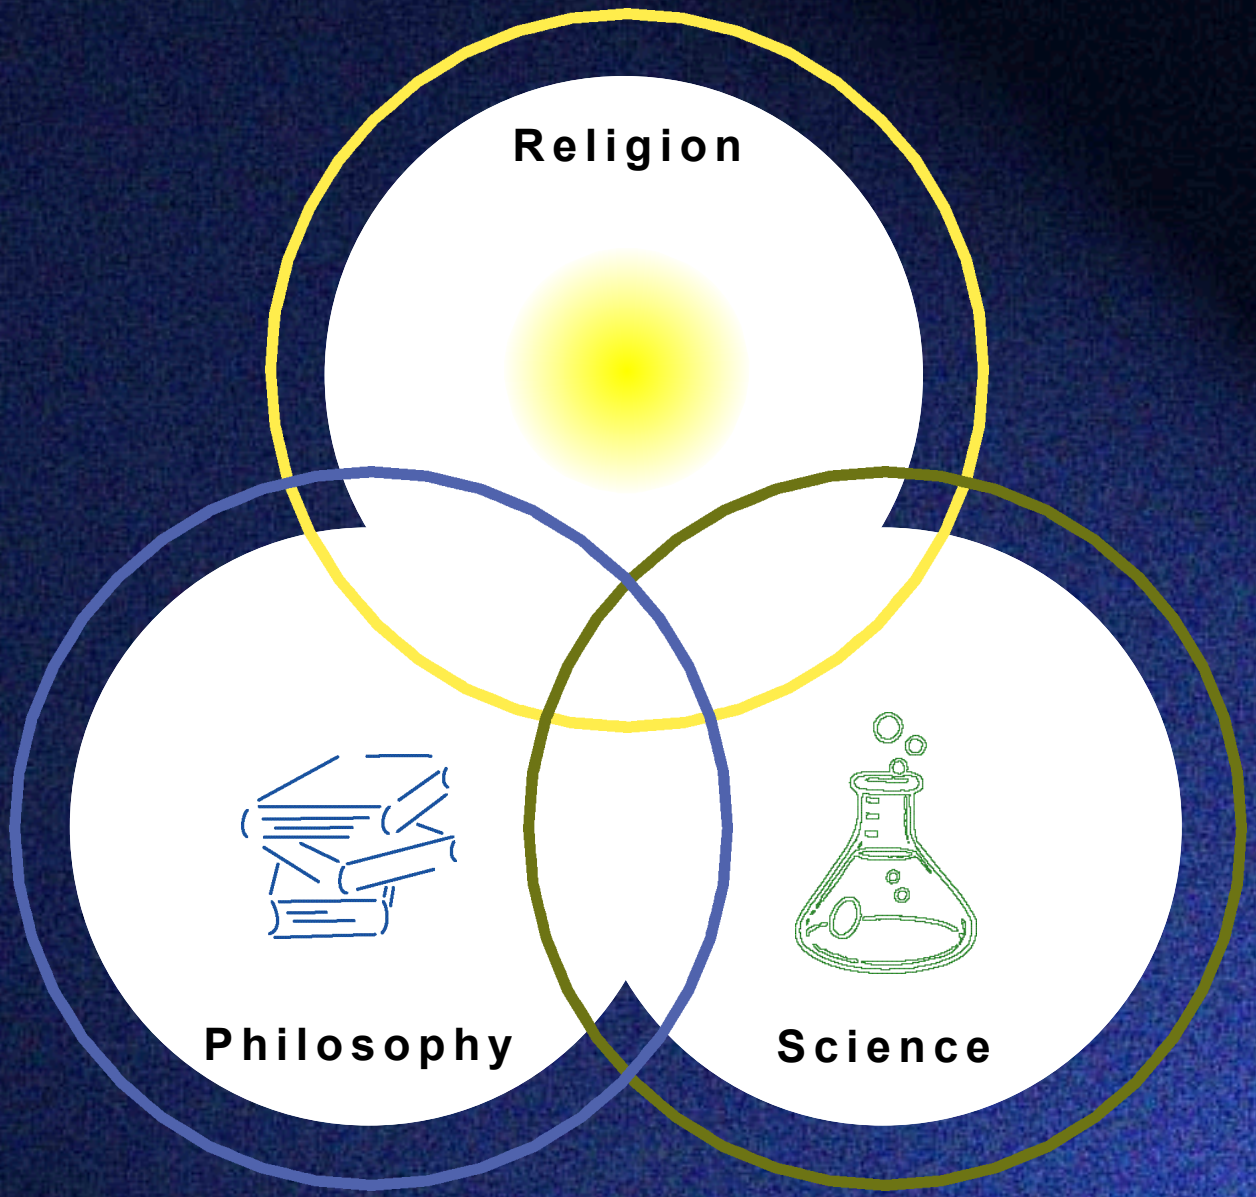
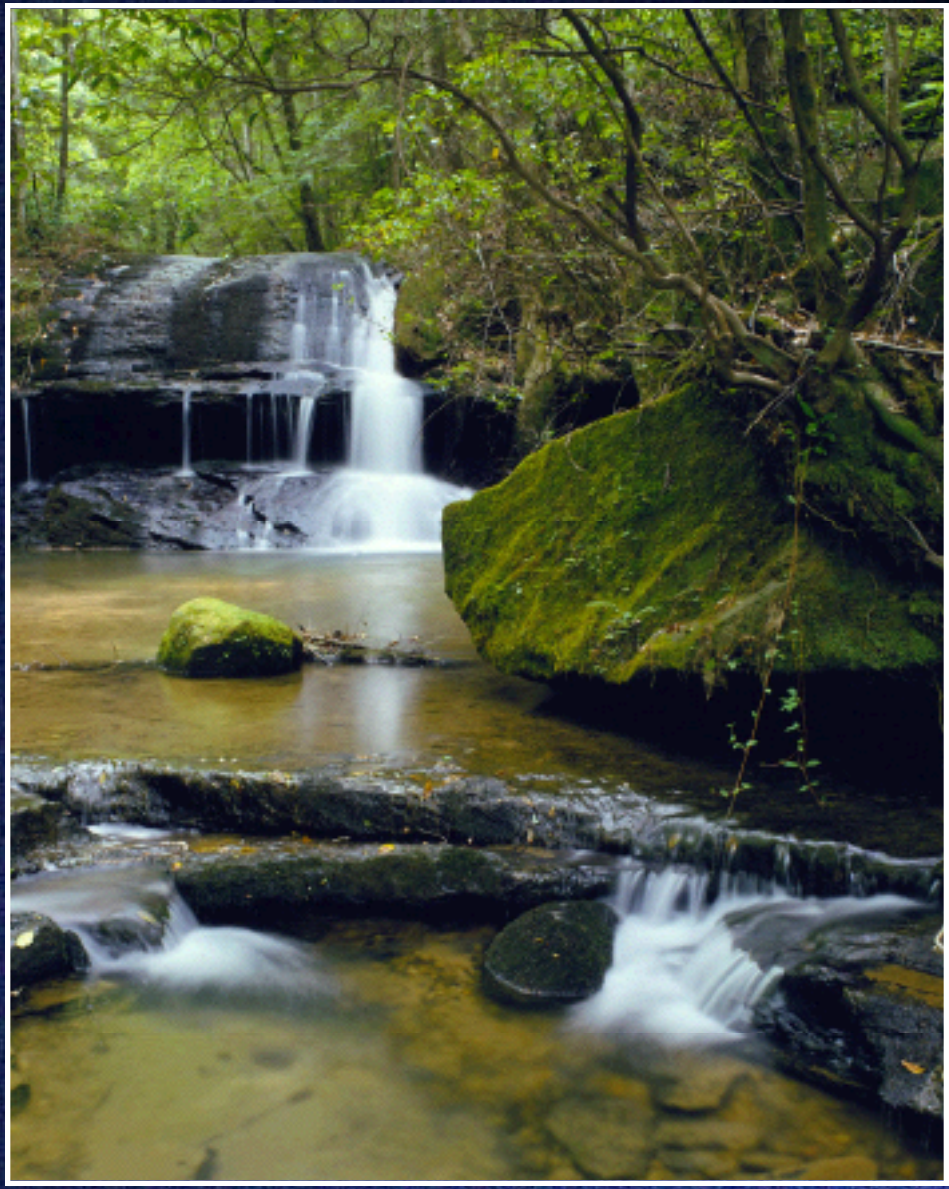
This is a presentation of the World Embracing Hope Foundation



It has been developed in the hopes of finding a
Universal philosophy for Humankind.



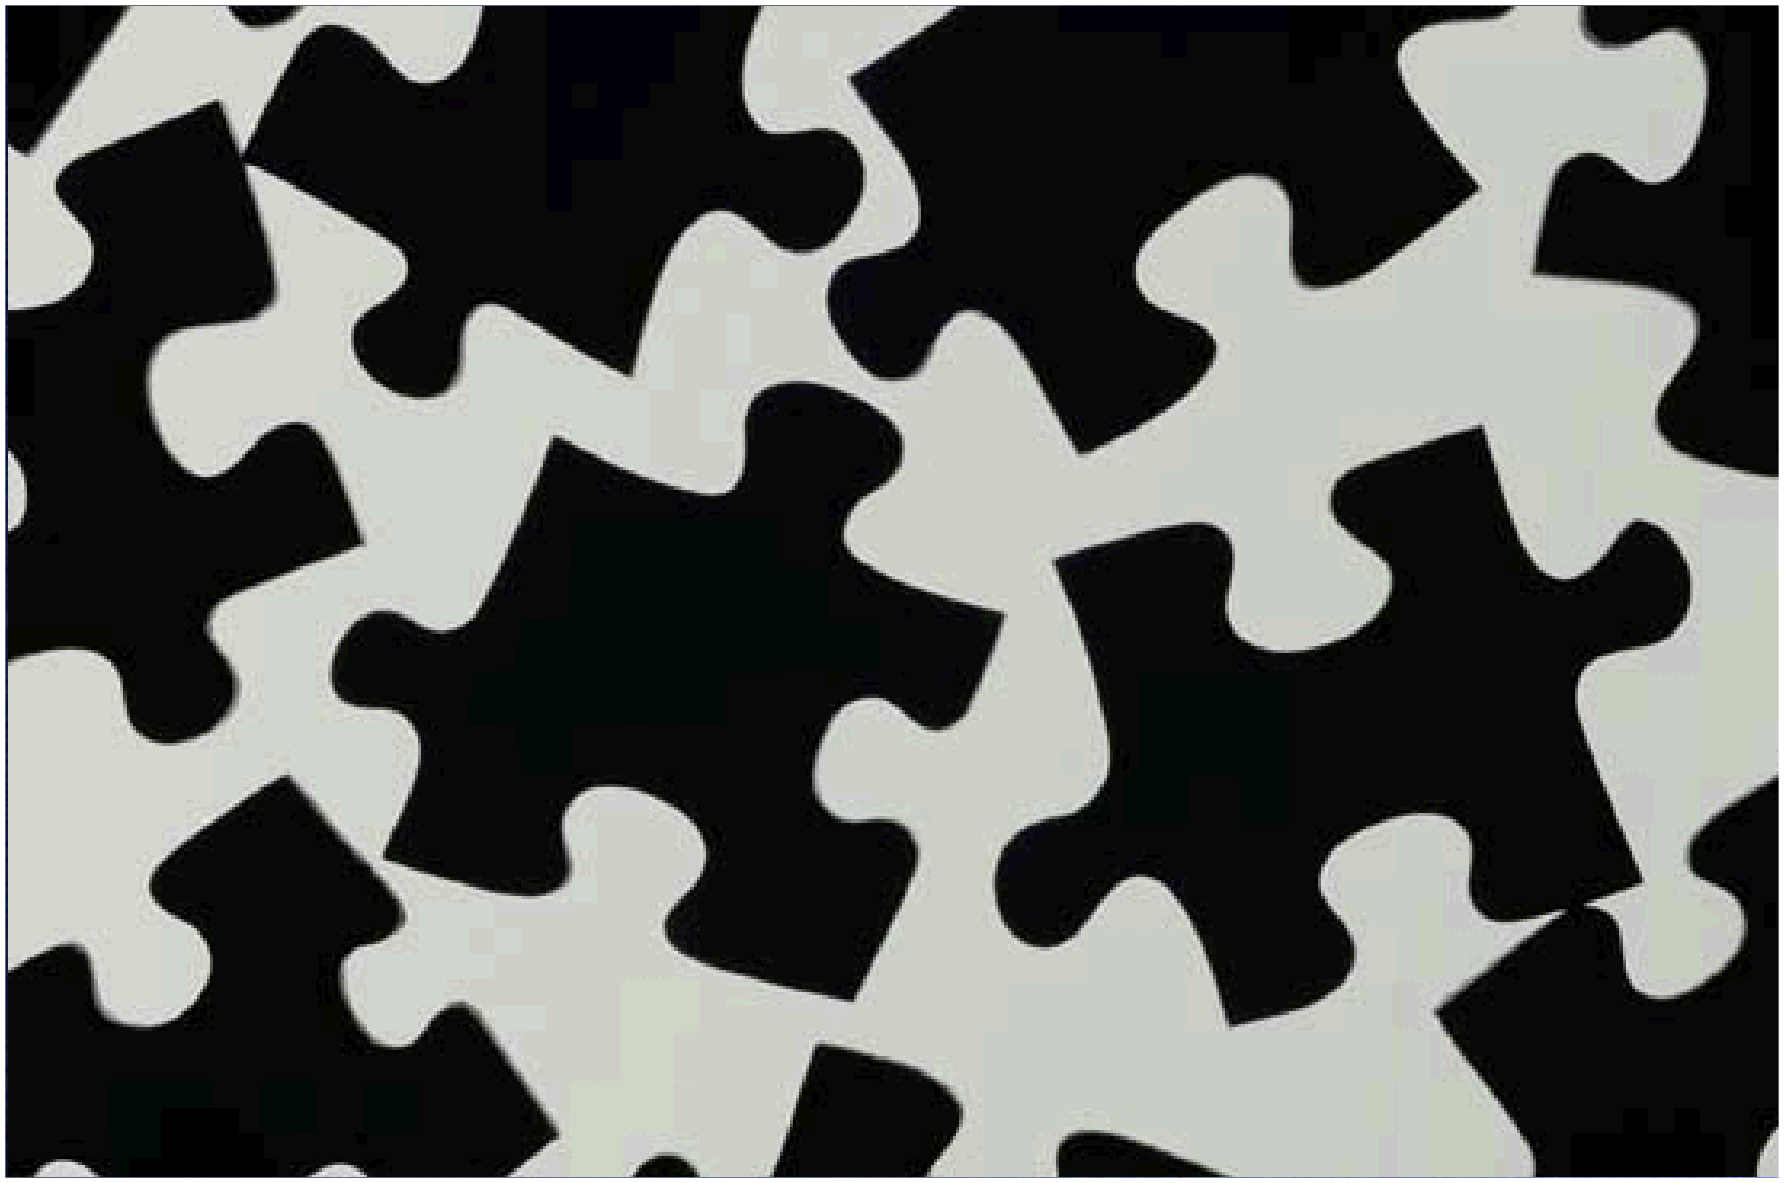
This is a foundation in search of ‘truth’. This is a foundation in search of a Universal philosophy based upon such ‘truths’.

This ‘Universal Philosophy’ - this means of modeling a ‘universal ethic’ upon which we can all agree needs to be found

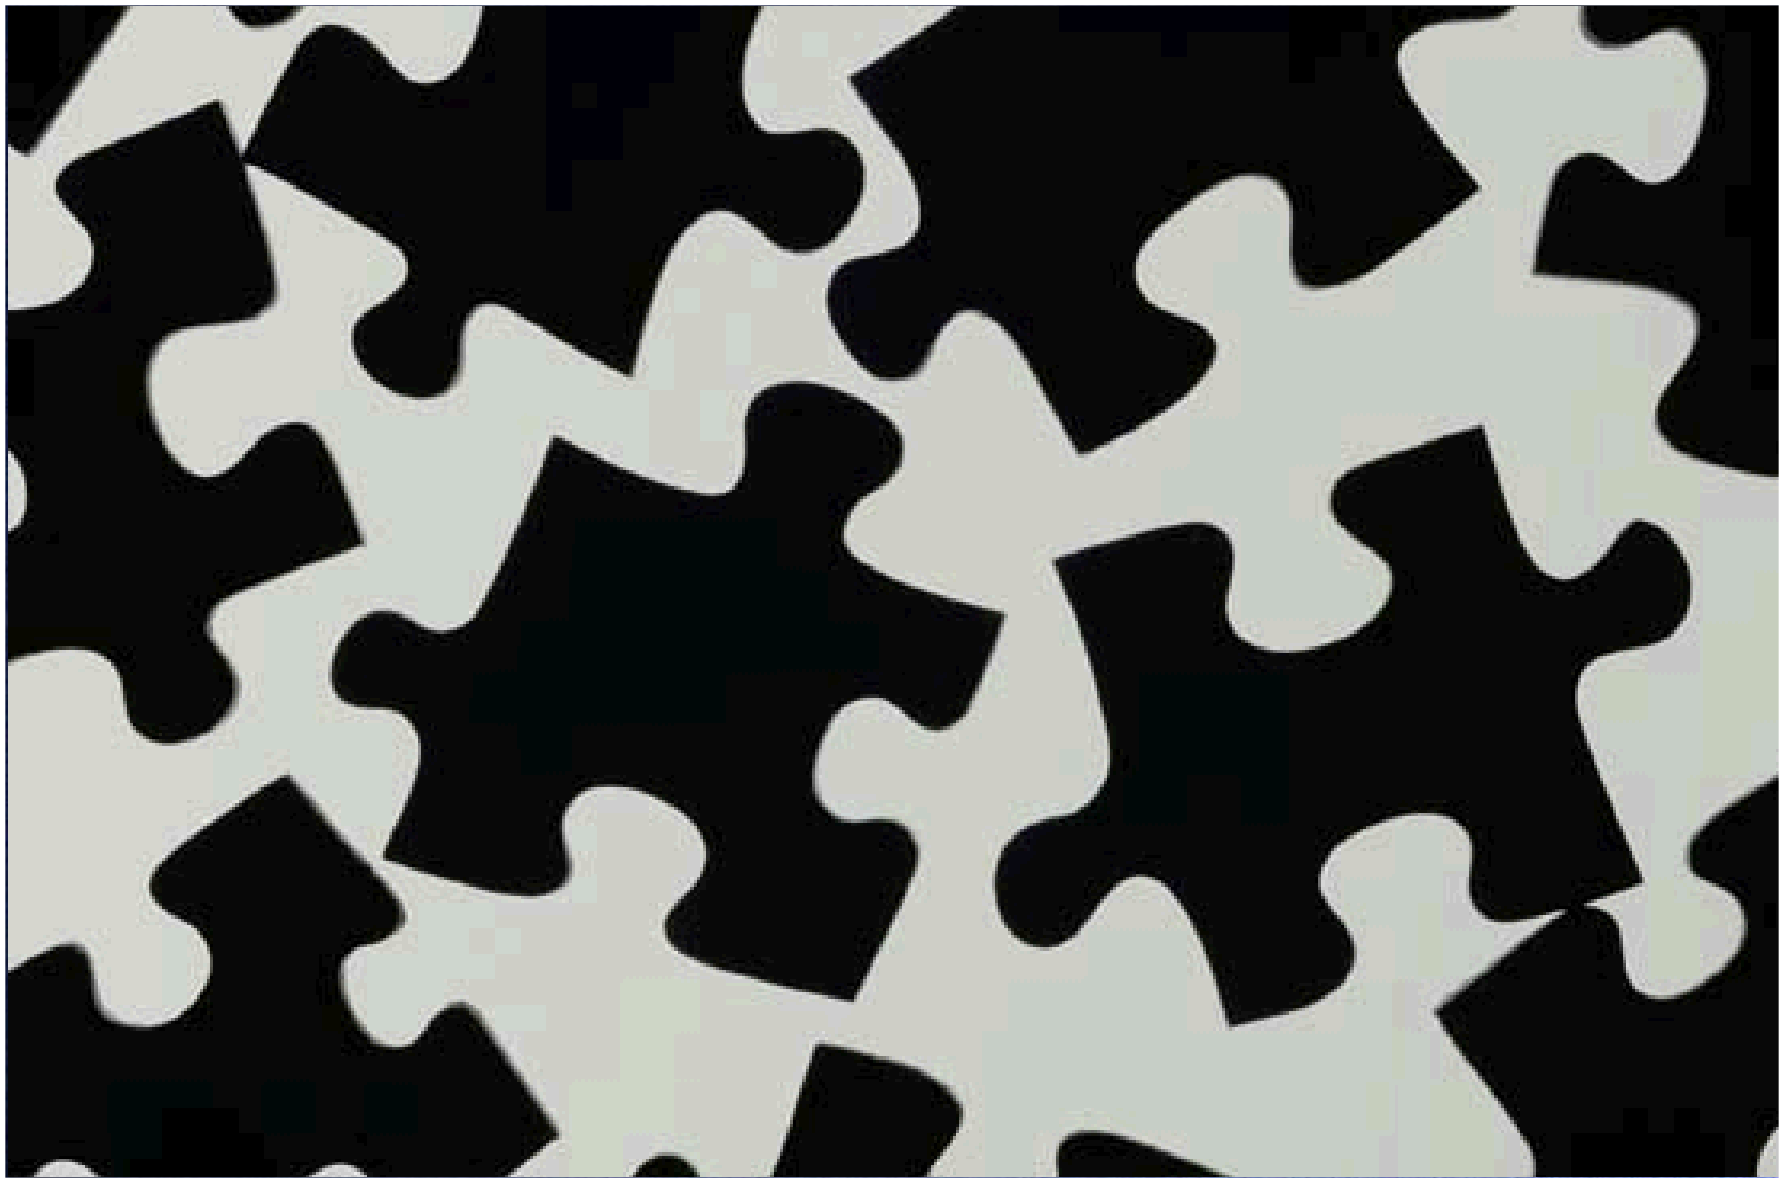
in order to resolve the many socially divisive issues
we confront as a specie.

Perhaps more importantly, we need to develop this understanding before we confront other life forms throughout

the Universe with whom we may have decidedly differing views.

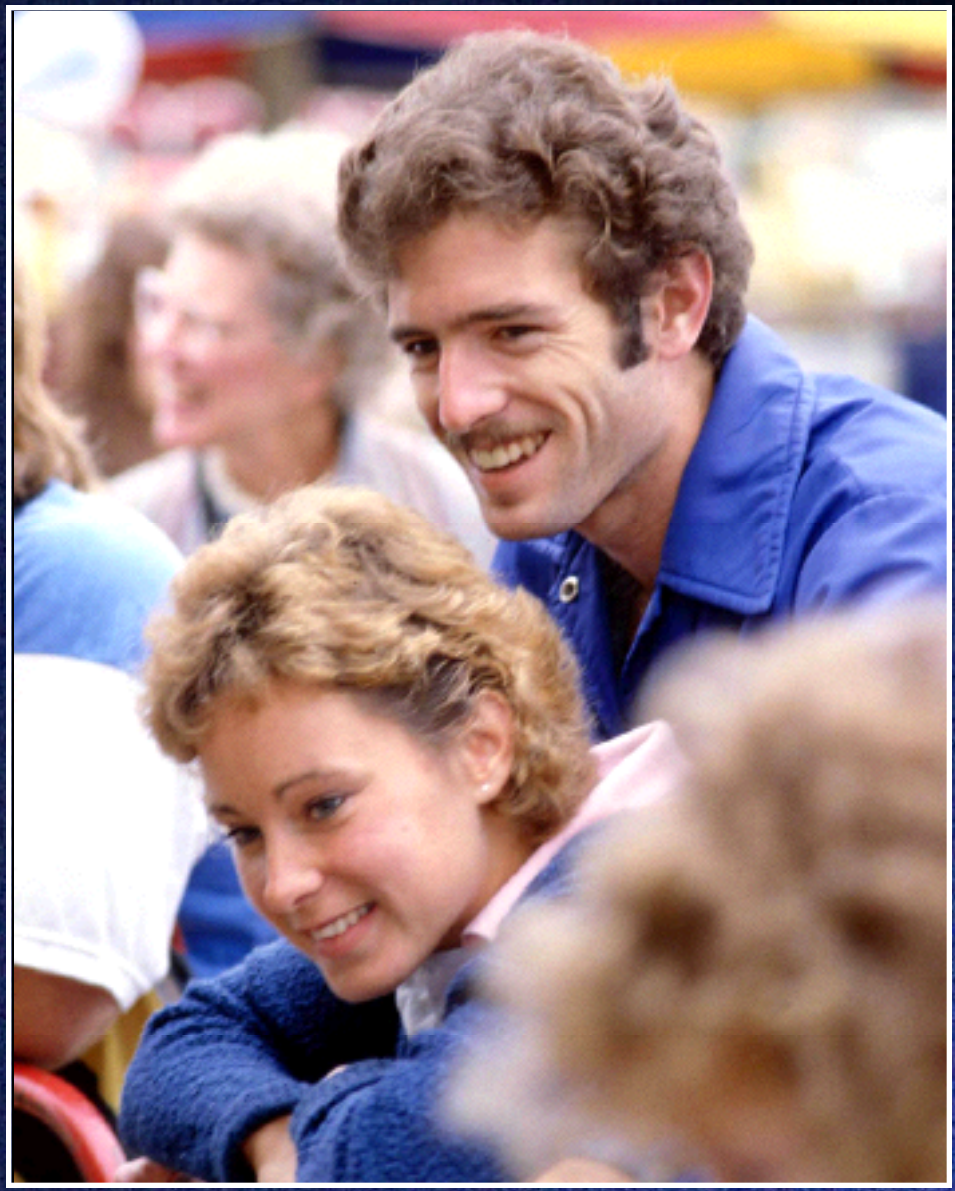


In order to develop this Universal Philosophy,
this presentation examines



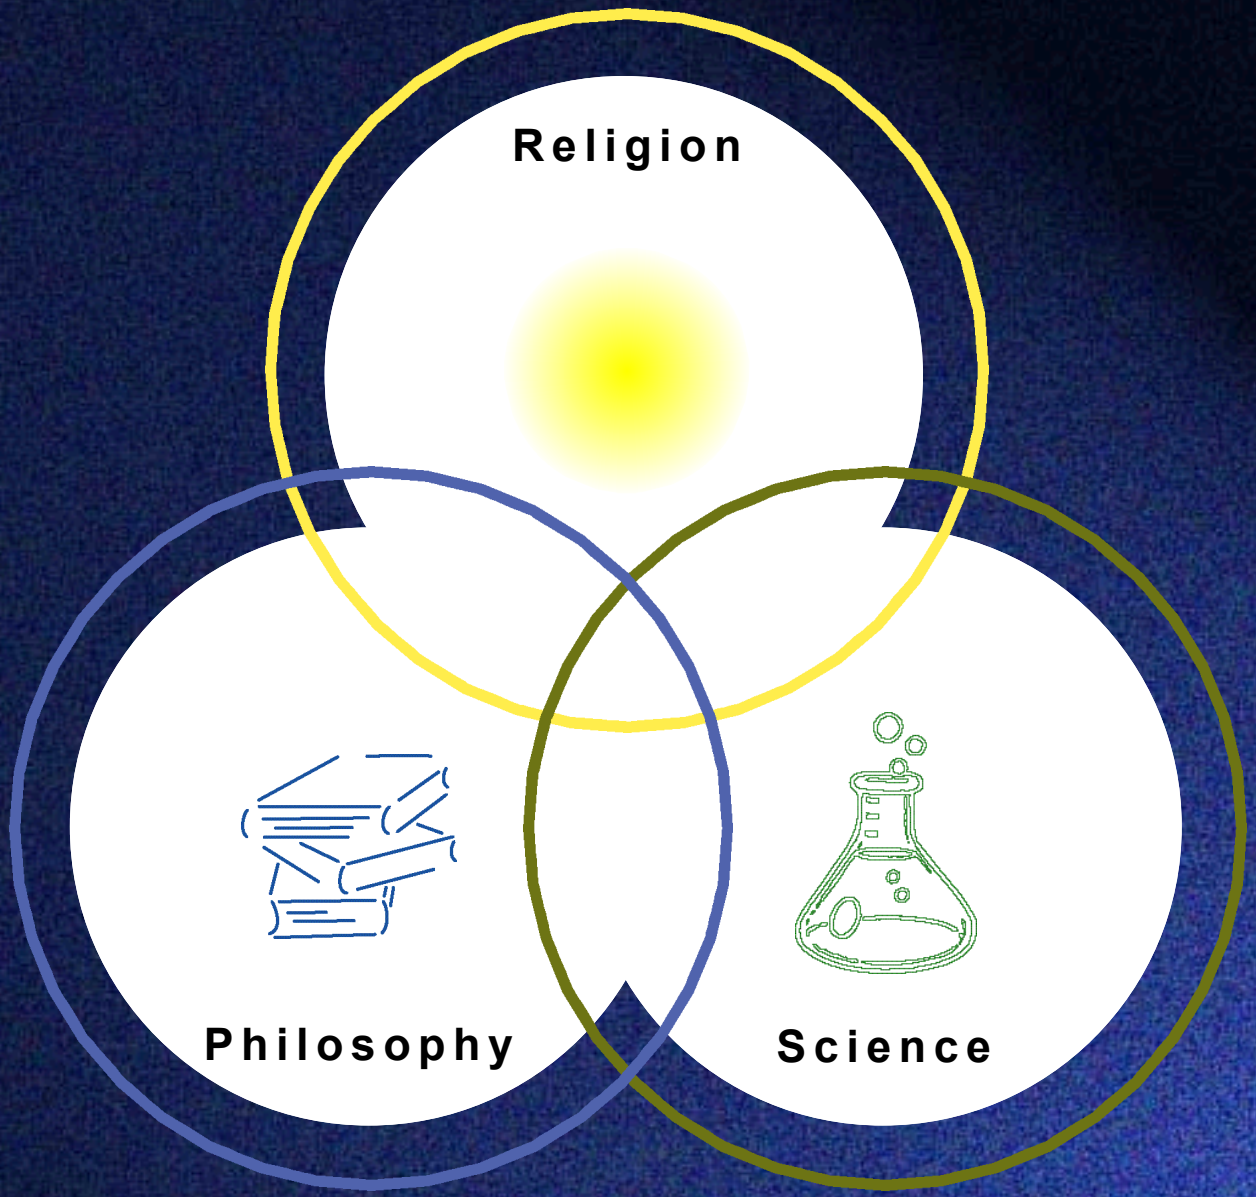
three fundamental questions our specie has been seeking to answer:

Where are we?

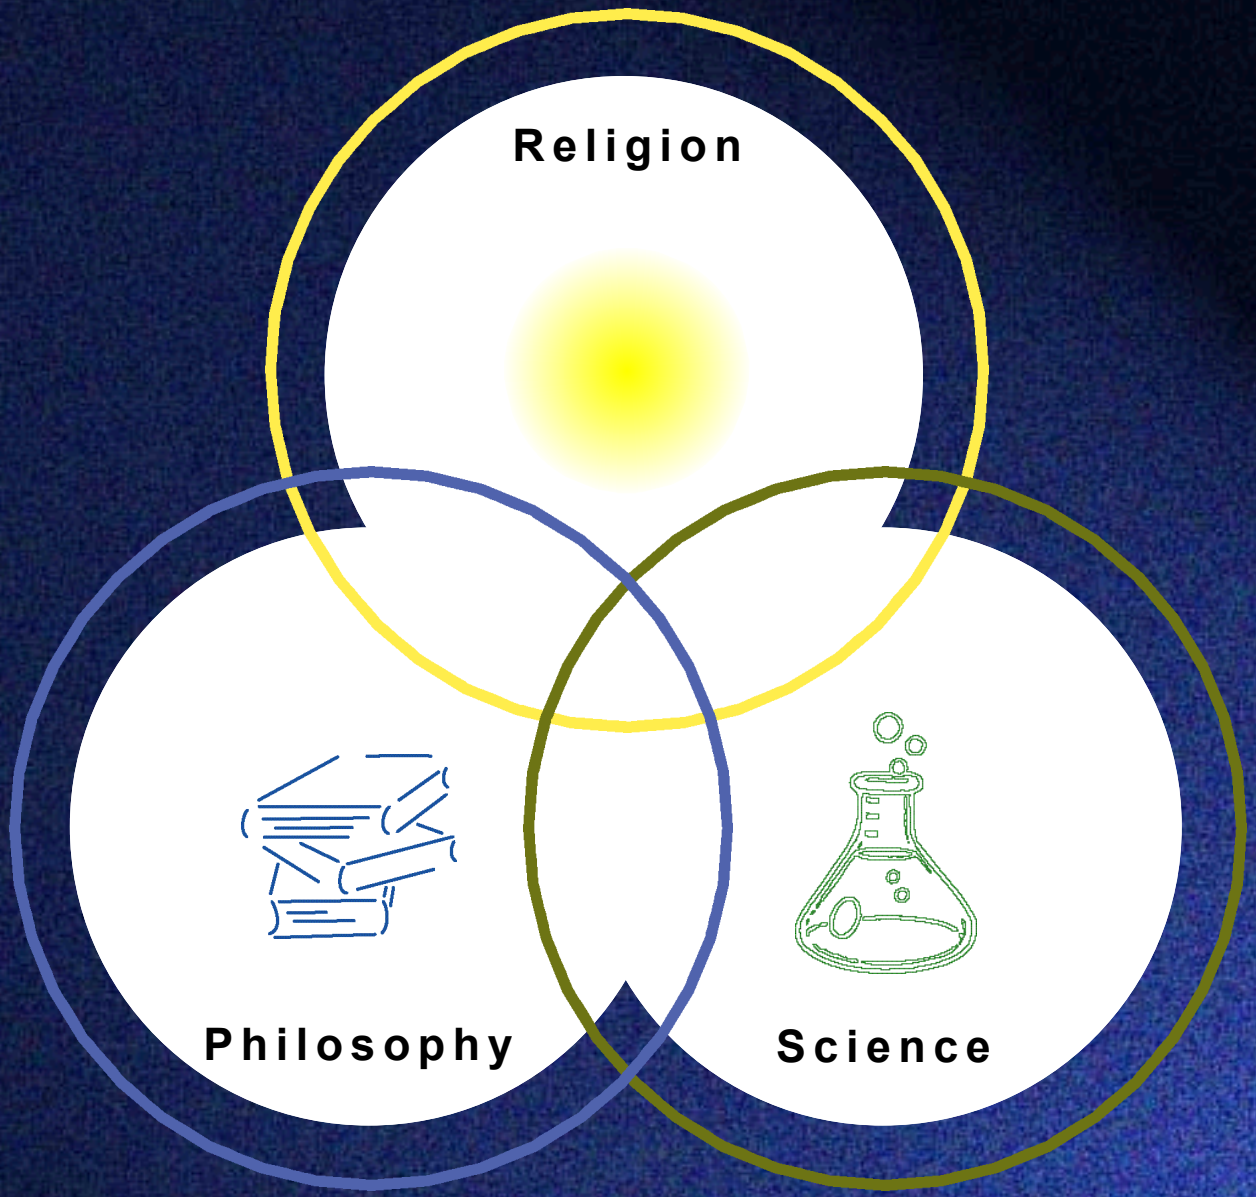


What are we?

and
Why do we exist?



The World Embracing Hope Foundation believes the answers we find to these three questions hold the key to why we behave as we



do and as to how we can greatly reduce the negative aspect of our behaviors. We appear to have three means at our

- Faith - What we can believe
- Observation - What we can measure
- Reason - What we can rationalize

disposal for seeking answers to these fundamental questions.
We have faith - what we can believe.

- Faith - What we can believe
- Observation - What we can measure
- Reason - What we can rationalize

We have observation - what we can measure.

- Faith - What we can believe
- Observation - What we can measure
- Reason - What we can rationalize

And we have reason - what we can rationalize.

- Faith - What we can believe
- Observation - What we can measure
- Reason - What we can rationalize

These three means of developing answers to questions we constantly confront are best personified by the fields of

CARL SAGAN

“We are privileged to influence and perhaps control our future. I believe we have an obligation to fight for others, who

came before us, to whom we are all beholden, and for all those who, if we are wise enough will come after. There is no cause

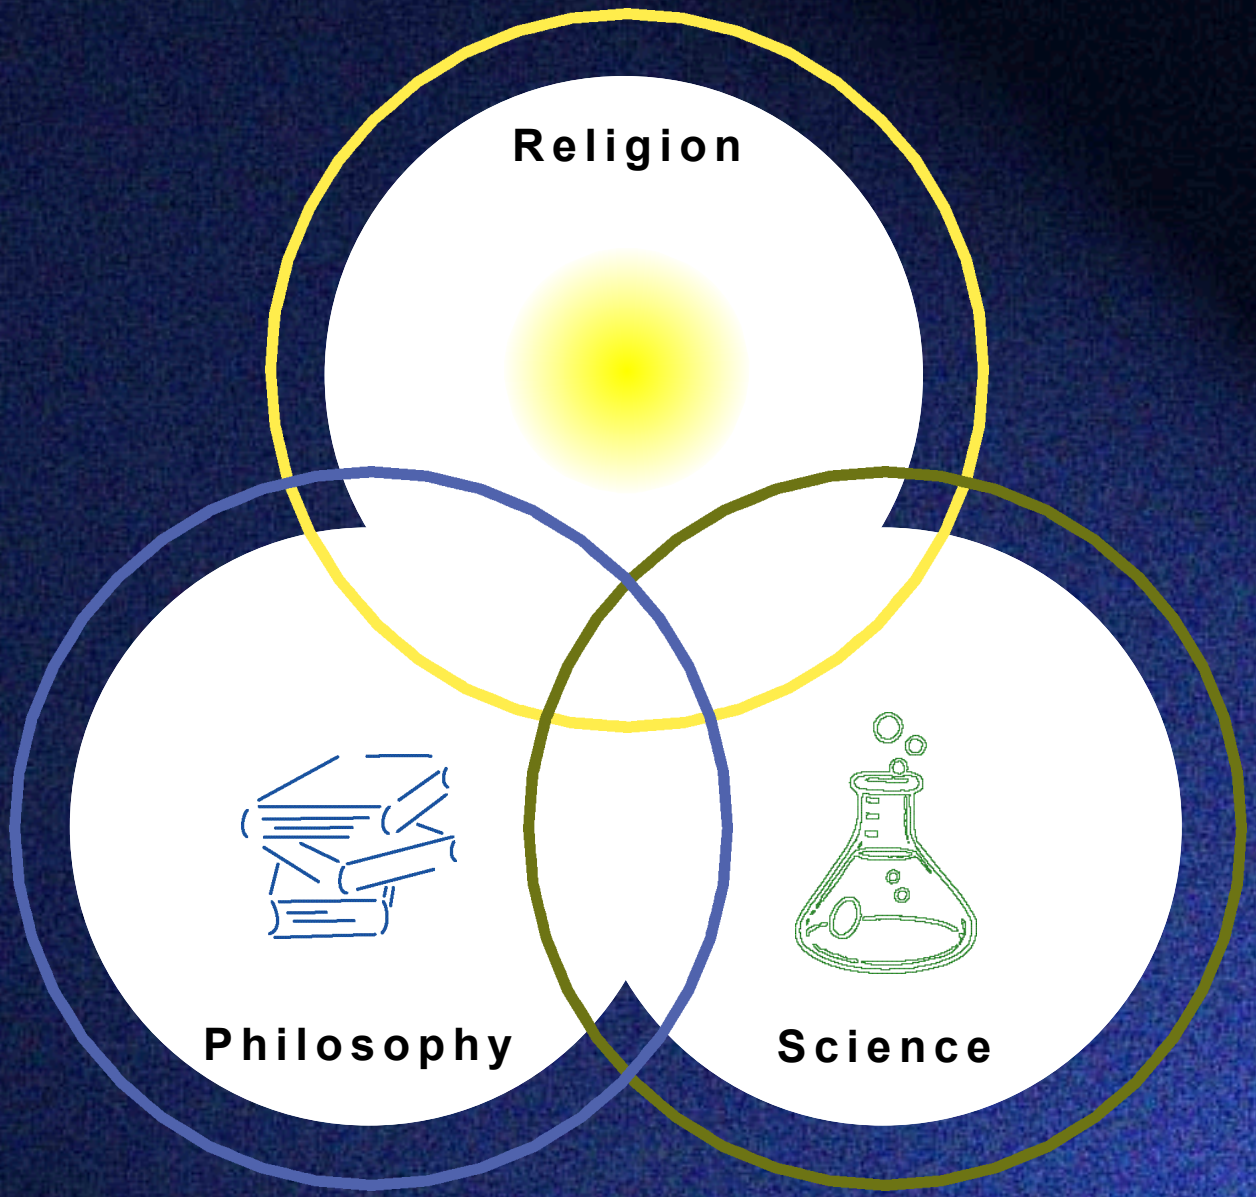
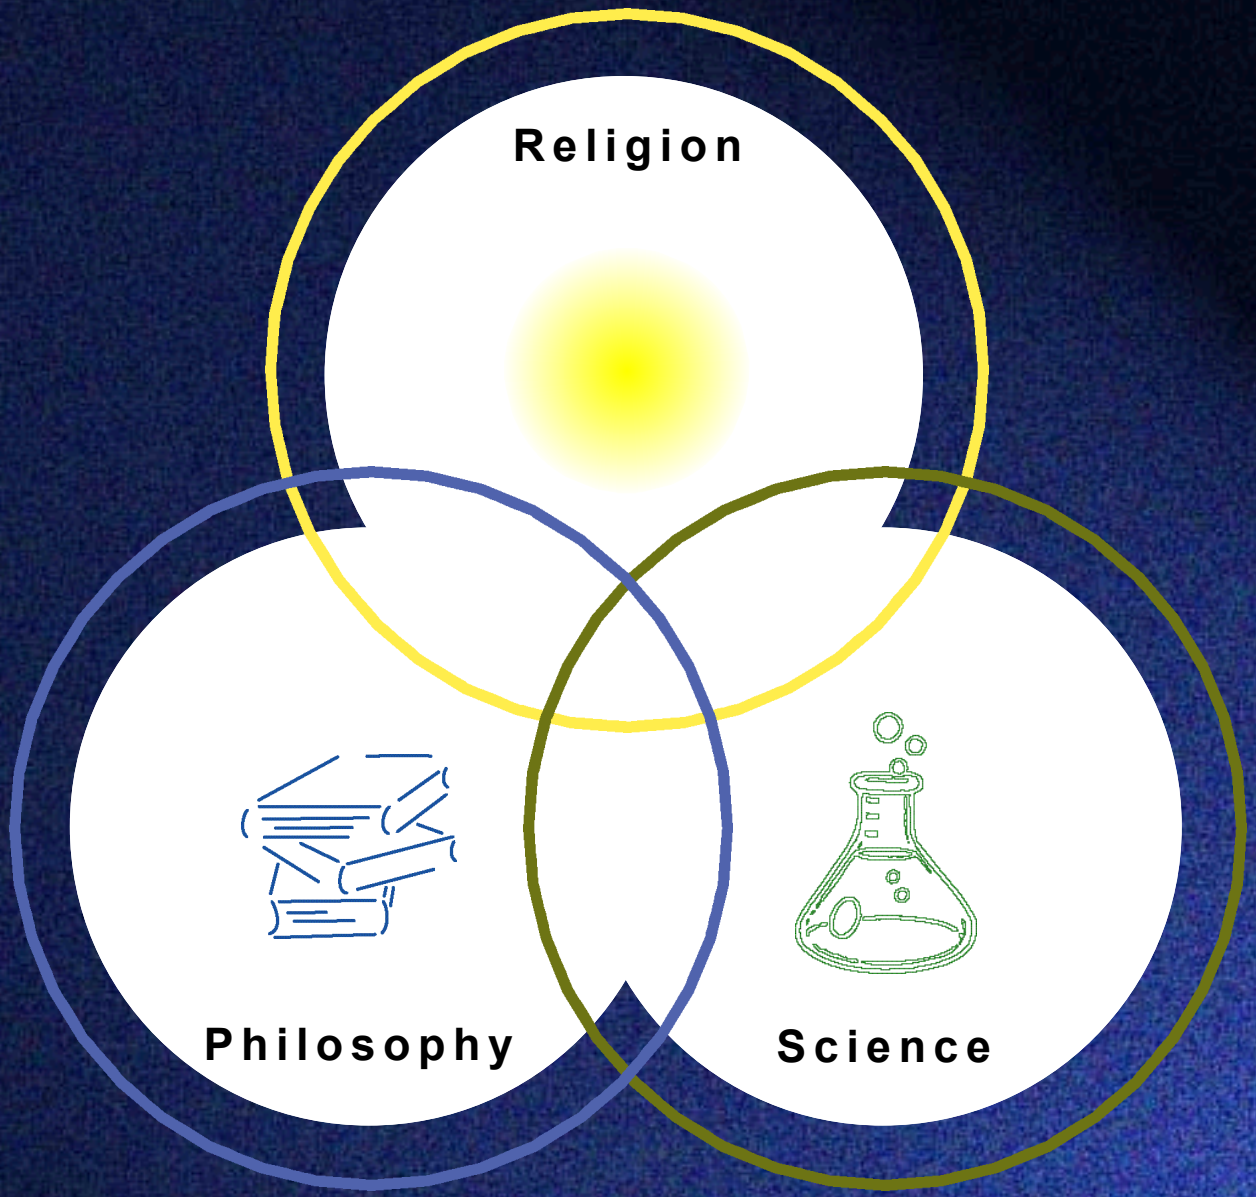
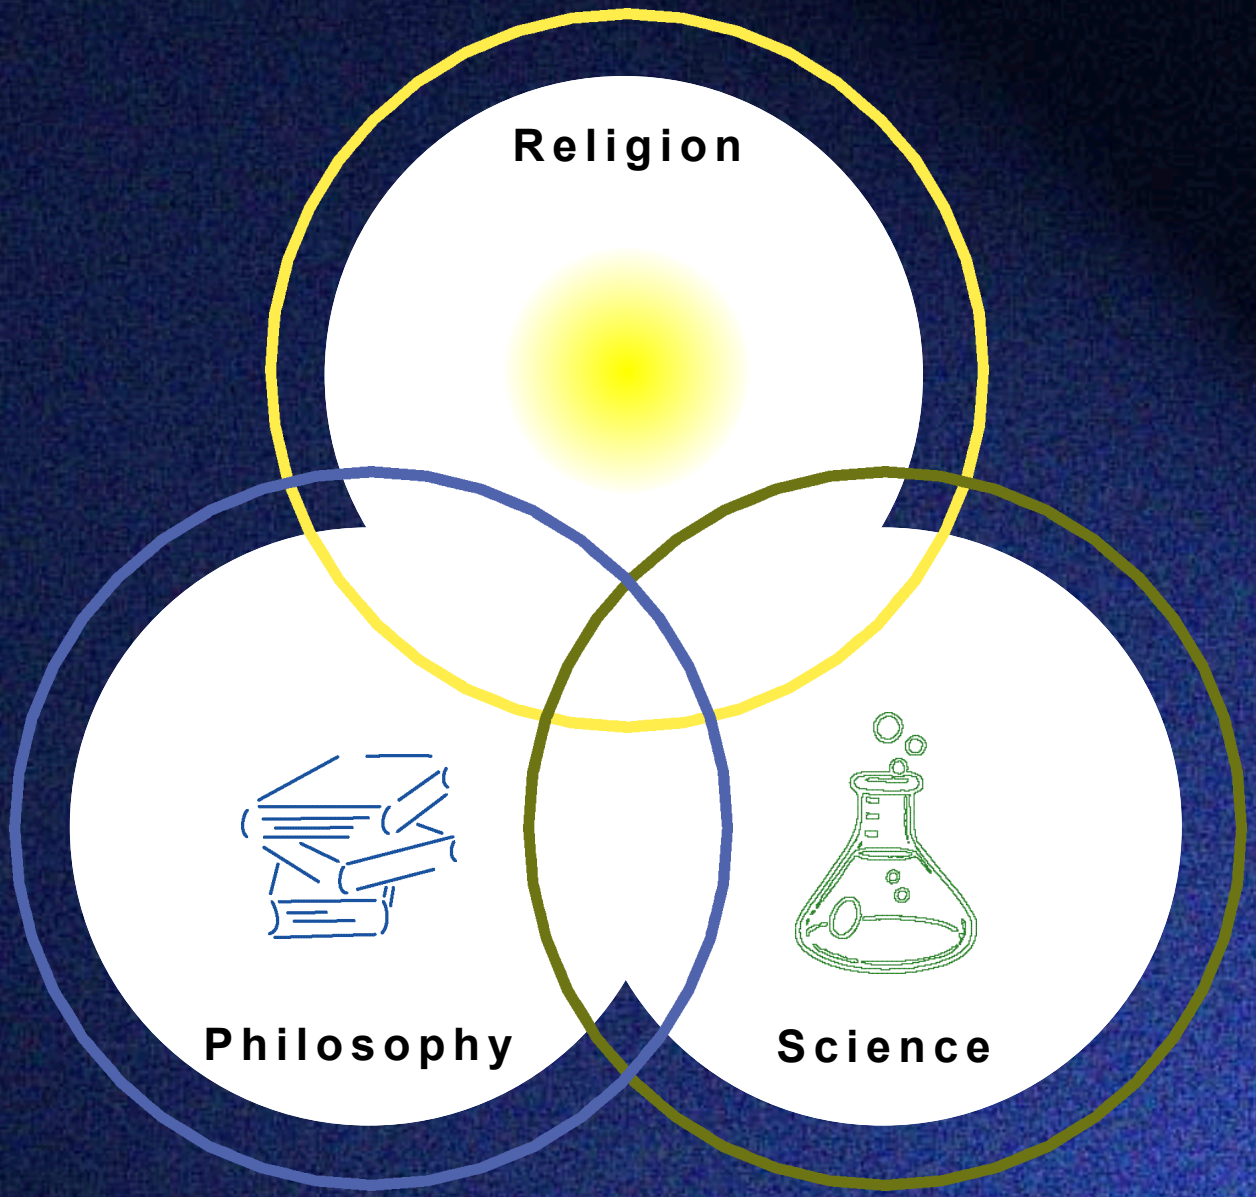
No social convention, no political system, no economic hypothesis, no religious dogma is more important.”



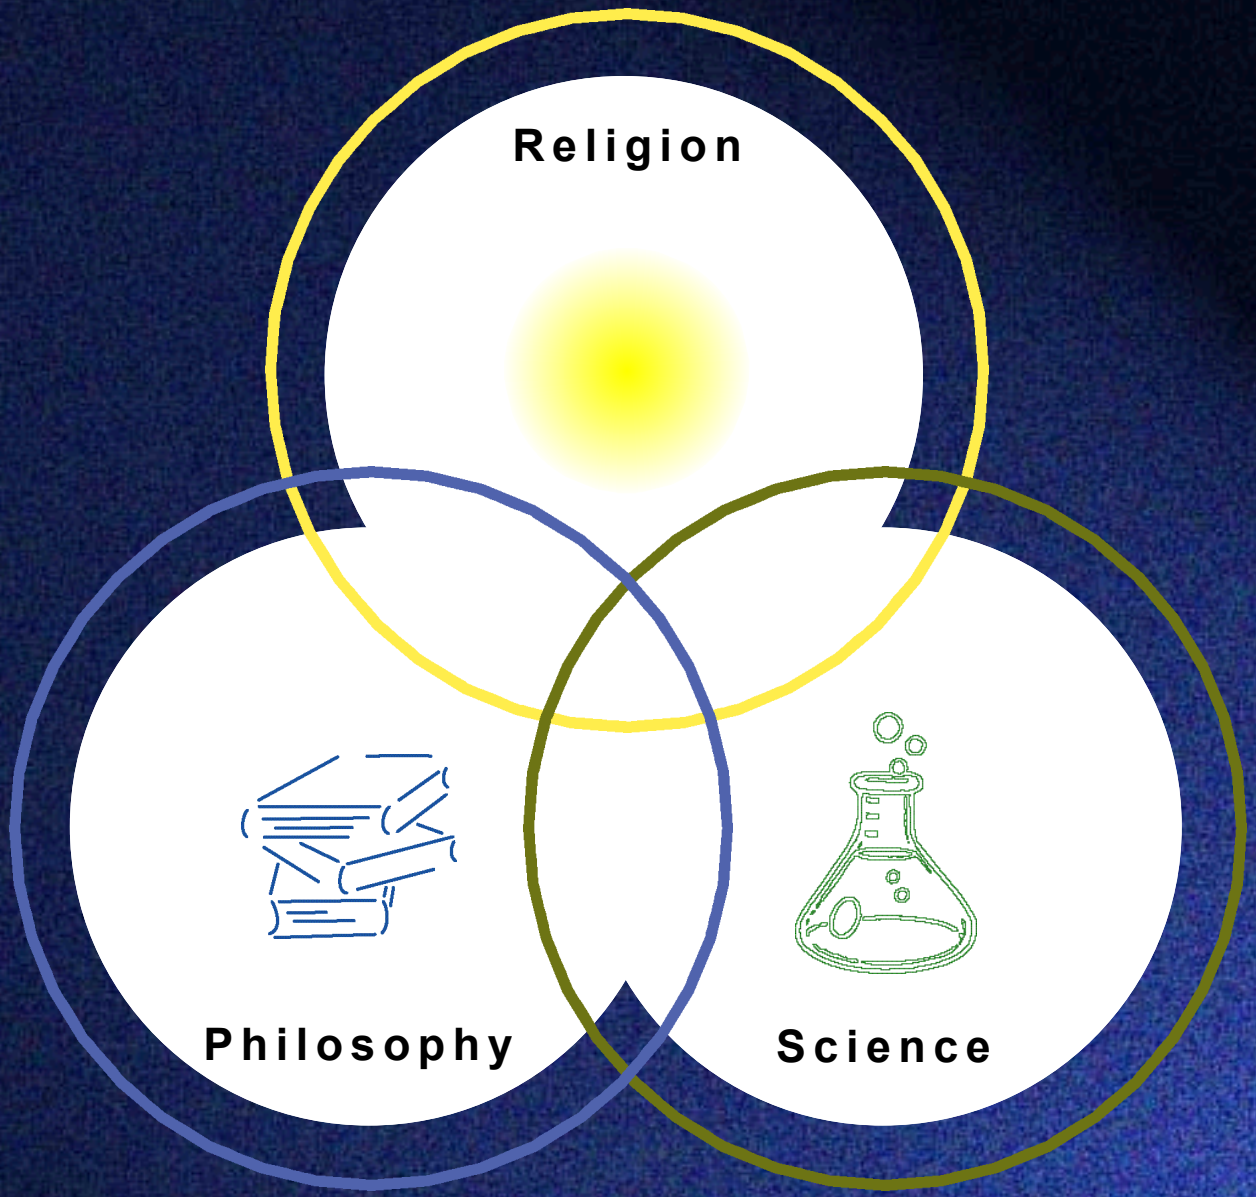
It is with a sense of Great Honor that the World Embracing Hope Foundation finds itself in the position to act as your guide



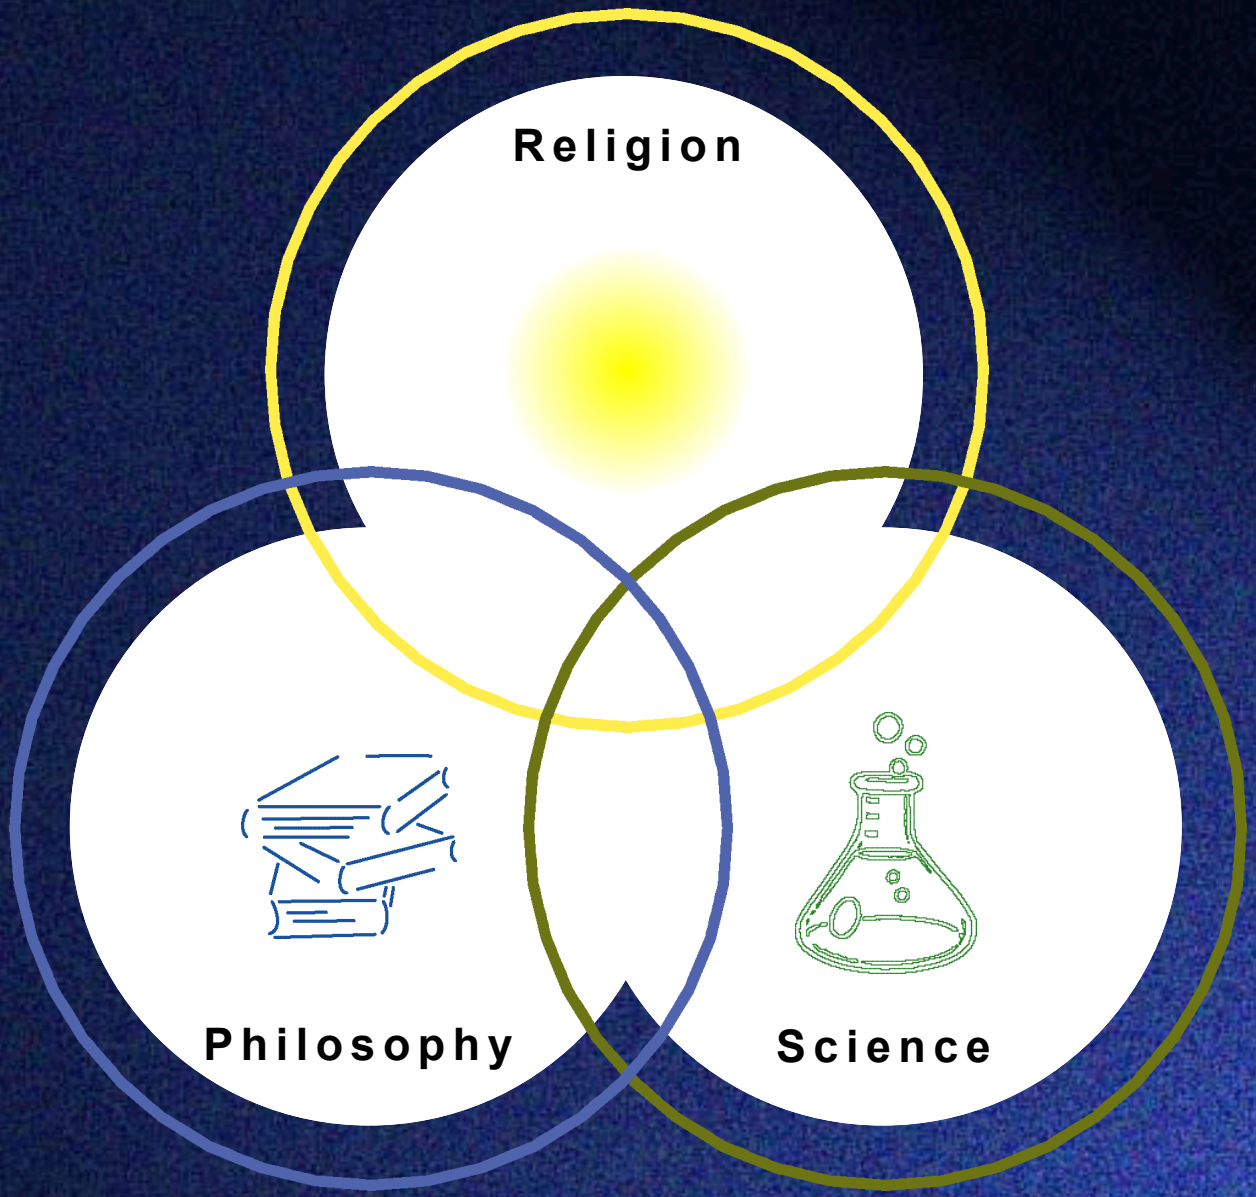
as you journey to seek answers to the fundamental questions:
Where are you?, What are you?, and Why do you exist?



It is the hope of the World Embracing Hope Foundation that it will have the honor of helping to guide Humankind along this same journey.



The means by which the World Embracing Hope Foundation hopes to stimulate such a journey is through encouraging something the



Foundation calls a perceptual shift for Humankind. It is the belief of the World Embracing Hope Foundation that perceptions generate

actions, actions generate reactions, and reactions generate ambiances which wash over each other and every one of us.
